Краткое сравнение

GPT-5.6 Terra (max) — одна из ведущих моделей по уровню интеллекта, но она несколько дороже других моделей аналогичной стоимости. Она также отличается высокой скоростью работы, но при этом довольно многословна. Модель поддерживает ввод текста и изображений, выводит текст и имеет контекстное окно в 1 млн токенов.

GPT-5.6 Terra (max) набирает 55 баллов по индексу искусственного интеллекта, что значительно выше среднего среди сопоставимых моделей (в среднем 30). При оценке индекса искусственного интеллекта модель сгенерировала 96 млн токенов, что несколько многословно по сравнению со средним показателем 63 млн.

Цена на GPT-5.6 Terra (max) составляет 2,50 доллара за 1 МЛН входных токенов (несколько дороже, в среднем: 1,75 доллара) и 15,00 доллара за 1 МЛН выходных токенов (несколько дороже, в среднем: 8,40 доллара). В общей сложности оценка GPT-5,6 Terra (max) по индексу интеллекта обошлась в 1753,94 доллара.

Artificial Analysis Intelligence Index

AA-Omniscience

AA-Omniscience Index | AA-Omniscience Accuracy | AA-Omniscience Hallucination Rat

AA-Omniscience Index

AA-Omniscience Index (higher is better) measures knowledge reliability and hallucination. It rewards correct answers, penalizes hallucinations, and has no penalty for refusing to answer. Scores range from -100 to 100, where 0 means as many correct as incorrect answers, and negative scores mean more incorrect than correct.
