2023, монография

Монография изначально замысливалась, как своего рода манифест. С одной стороны, подводится итог пятнадцатилетней работы авторов, с другой — обозначаются перспективы дальнейших исследований. Авторы предлагают новый методологический принцип — нейросетевой подход, предназначен- ный, в том числе, для анализа активно формирующейся реальности — ин- формационно-коммуникативной среды, как формы ноосферной реальности. Сама ноосфера рассматривается, как сложная система. Строится ее нейросе- тевая модель, которая применима к различным подсистемам ноосферы без- относительно к их природе. Предлагается иной, отличный от дарвиновской теории, механизм эволюции сложных систем. Многие поднятые автором вопросы, носят заведомо дискуссионный характер. Это сделано осознано в целях стимулирования обсуждения наиболее актуальных вопросов совре- менности на междисциплинарной основе.
