Inference

About inference endpoint

S

Модели seed-2-0 и seedream-5-0-lite также поддерживаются в регионе eu-west-1 .

- Базовый URL по регионам:
 - ap-southeast-1 : <https://ark.ap-southeast.bytepluses.com/api/v3>
 - eu-west-1 : <https://ark.eu-west.bytepluses.com/api/v3>

Подробнее см. [Доступность регионов](#).

Семя Дола 2.0
Флагманская агентурная модель общего назначения
Создан для сложных рассуждений и выполнения длинных цепочек многоступенчатых задач в эпоху агентов

About inference endpoint

Dola Seedream 5.0

Ведущая модель создания изображений

Улучшенная согласованность ссылок и
улучшенное качество генерации для
профессиональных сценариев

Основное использование

Узнайте об использовании модели, ограничениях скорости и примерах кода для распространенных вариантов использования.

Глубокий анализ

Inference

About inference endpoint

video information

Понимание документов

Принимает файлы PDF и отвечает на основе информации о документе

Создание видео

Создание профессиональных видеороликов высокой четкости

Генерация изображений

Создает высококачественные изображения на основе текста и картинок

Веб-поиск

Получение знаний в режиме реального времени через интернет

Вызов функции

Вызывает пользовательские инструменты для расширения возможностей модели

Inference

About inference endpoint

Ввод файла

Используйте File API для загрузки и предварительной обработки видео, изображений и PDF-файлов

Batch inference

Significantly improves throughput, reduces costs, and is suitable for tasks that do not require an immediate response

Context caching

Cache fixed context to reduce repeated computing costs

Cloud-deployed MCP

Call various MCP tools in vertical domains to enhance model capabilities
