Certifications

Beginner Certifications

CompTIA A+

CompTIA Linux+

CompTIA Network+

CCNA

CompTIA Security+

Advanced Certifications

CEH

CISA

CISM

GSEC

GPEN

GWAPT

GIAC

OSCP

CREST

CISSP

VMWare

VirtualBox

esxi

proxmox

Common Virtualization Technologies

Hypervisor

GuestOS

HostOS

VM

Basics of Virtualization

ipconfig

ping

dig

netstat

route

nmap

tcpdump

arp

tracert

nslookup

iptables

Packet Sniffers

Port Scanners

Protocol Analyzers

Troubleshooting Tools

Kerberos

RADIUS

LDAP

SSO

Certificates

Local Auth

Cyber Security

Fundamental IT Skills

Computer Hardware Components

Connection Types and their function

OS-Independent Troubleshooting

Understand Basics of Popular Suites

Basics of Computer Networking

NFC

Bluetooth

WiFi

Infrared

MS Office Suite

iCloud

Google Suite

Windows

Linux

MacOS

Operating Systems

Learn following for each

Installation and Configuration

Different Versions and Differences

Navigating using GUI and CLI

Understand Permissions

Installing Software and Applications

Performing CRUD on Files

Troubleshooting

Common Commands

Networking Knowledge

Understand the OSI Model

Common Protocols and their Uses

Common Ports and their Uses

SSL and TLS Basics

Basics of Subnetting

Public vs Private IP Addresses

IP Terminology

localhost

loopback

CIDR

subnet mask

default gateway

Understand the Terminology

VLAN

DMZ

ARP

VM

DHCP

DNS

NAT

IP

Router

Switch

VPN

MAN

LAN

WAN

WLAN

Understand these

DHCP

DNS

NTP

IPAM

Functions of each

Star

Ring

Mesh

Bus

Network Topologies

SSH

RDP

FTP

SFTP

HTTP / HTTPS

SSL / TLS

Authentication Methodologies

Network Protocols

Basics of NAS and SAN

Security Skills and Knowledge

Understand Common Hacking Tools

Core Concepts of Zero Trust

Understand Common Exploit Frameworks

Roles of Compliance and Auditors

Blue / Red / Purple Teams

Understand Concept of Defense in Depth

Understand the Definition of Risk

False Negative / False Positive

Understand Concept of Runbooks

Understand Backups and Resiliency

True Negative / True Positive

Understand Basics of Forensics

Cyber Kill Chain

Basics of Threat Intel, OSINT

Basics and Concepts of Threat Hunting

MFA & 2FA

Honeypots

Understand Handshakes

Basics of Vulnerability Management

Operating System Hardening

Understand CIA Triad

Basics of Reverse Engineering

Understand Concept of Isolation

Privilege Escalation

Penetration Testing Rules of Engagement

Basics of IDS and IPS

Web Based Attacks and OWASP10

Perimeter vs DMZ vs Segmentation

Authentication vs Authorization

Learn how Malware works and Types

Tools for Incident Response and Discovery

dig

nmap

ping

arp

cat

dd

tail

hping

head

grep

nslookup

tracert

winhex

autopsy

ipconfig

curl

wireshark

memdump

FTK Imager

Understand Common Standards

ISO

RMF

NIST

CIS

CSF

Using tools for Unintended Purposes

LOLBAS

GTFOBINS

WADCOMS

Learn how to find and use these logs

Event Logs

syslogs

netflow

Packet Captures

Firewall Logs

Understand Hardening Concepts

MAC-based

NAC-based

Port Blocking

Group Policy

Sinkholes

ACLs

Patching

Jump Server

Endpoint Security

Understand Common Tools

Basics of Cryptography

Salting

Hashing

Key Exchange

Private vs Public Keys

PKI

Obfuscation

Understand Frameworks

Diamond Model

Kill Chain

ATT&CK

Common Distros for hacking

ParrotOS

Kali Linux

Understand the following

SIEM

SOAR

Secure vs Unsecure Protocols

FTP vs SFTP

SSL vs TLS

IPSEC

DNSSEC

LDAPS

S RTP

S/MIME

Understand the following Terms

Antivirus

Antimalware

EDR

DLP

Firewall & Nextgen Firewall

HIPS

NIDS

NIPS

Host Based Firewall

Sandboxing

EAP vs PEAP

WPS

ACL

WPA vs WPA2 vs WPA3 vs WEP

Attack Types and Differences

Phishing

Whishing

Whaling

Smishing

Spam vs Spim

Shoulder Surfing

Tailgating

Dumpster Diving

Zero day

Social Engineering

Reconnaissance

Impersonation

Watering Hole Attack

Drive by Attack

Typo Squatting

Brute Force vs Password Spray

Common Attacks

DoS vs DDoS

MITM

CSRF

Spoofing

SQL Injection

XSS

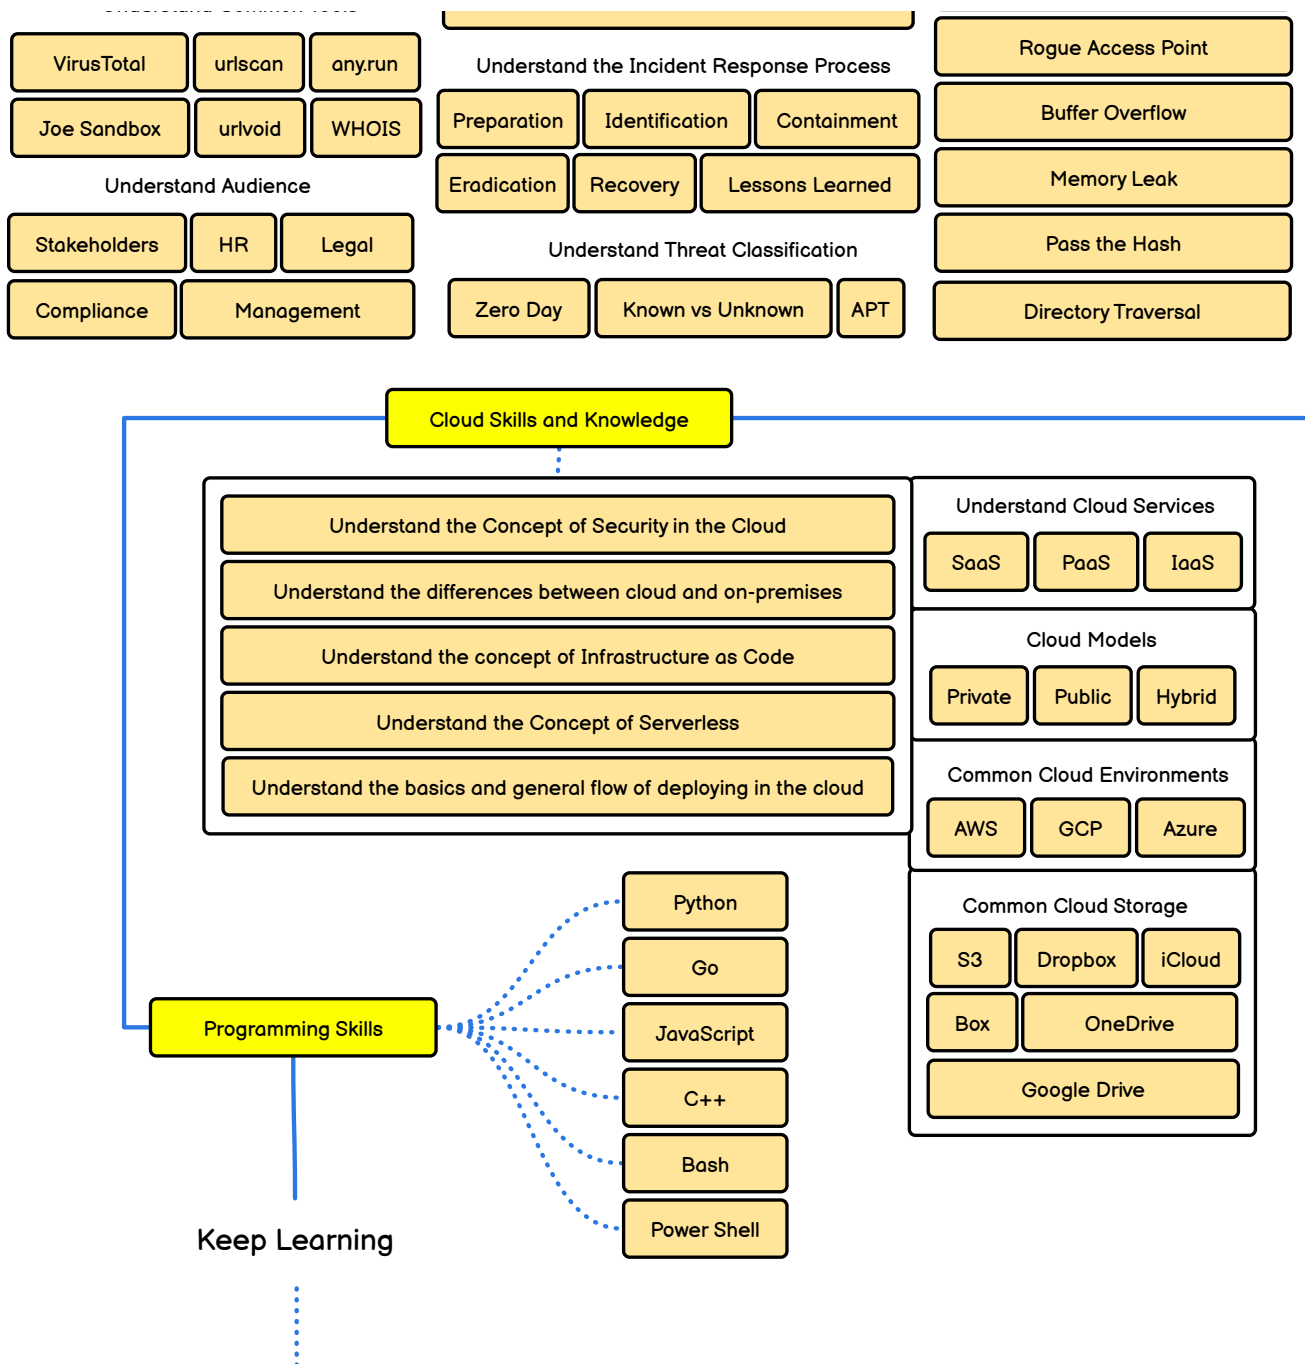

Evil Twin

VLAN Hopping

DNS Poisoning

Deauth Attack

Replay Attack
