Лесные пожары в Европе приводят к взрыву забытых бомб времен Второй мировой и холодной войны

В Европе полно закопанных взрывчатых веществ, оставшихся после войн XX века, а лесные пожары на континенте сейчас достаточно масштабны, сильны и продолжительны, чтобы добраться до них.

DISCUSSIONS

“As for Euler's formula, using $\text{Tau}/2$ would: (1) possibly feel more natural, since Tau would be associated with a whole circle, so $\text{Tau}/2$ might more easily be associated with the half-circle through which the number 1 rotates. (2) allow you get the first prime number into the formula, in addition to the other iconic things already there.”

— Doug Fay
