

Обновление системы: будущее финансов — за Coinbase

От имени: Coinbase 17 декабря 2025 г.

TL;DR: Сегодня мы запустили несколько новых продуктов, которые приблизят будущее финансов на Coinbase. Среди них — начало внедрения торговли акциями и рынков предсказаний в основном приложении Coinbase, а также простой интерфейс для торговли фьючерсами и опционами, возможность торговать всеми активами Solana сразу после их создания, первичные продажи токенов, глобальный запуск Base App как ончейн-приложения «для всего», а также общая доступность Coinbase Business. Каждое из них знаменует собой важный шаг на пути к превращению Coinbase в финансовую платформу мирового уровня для частных лиц и компаний.

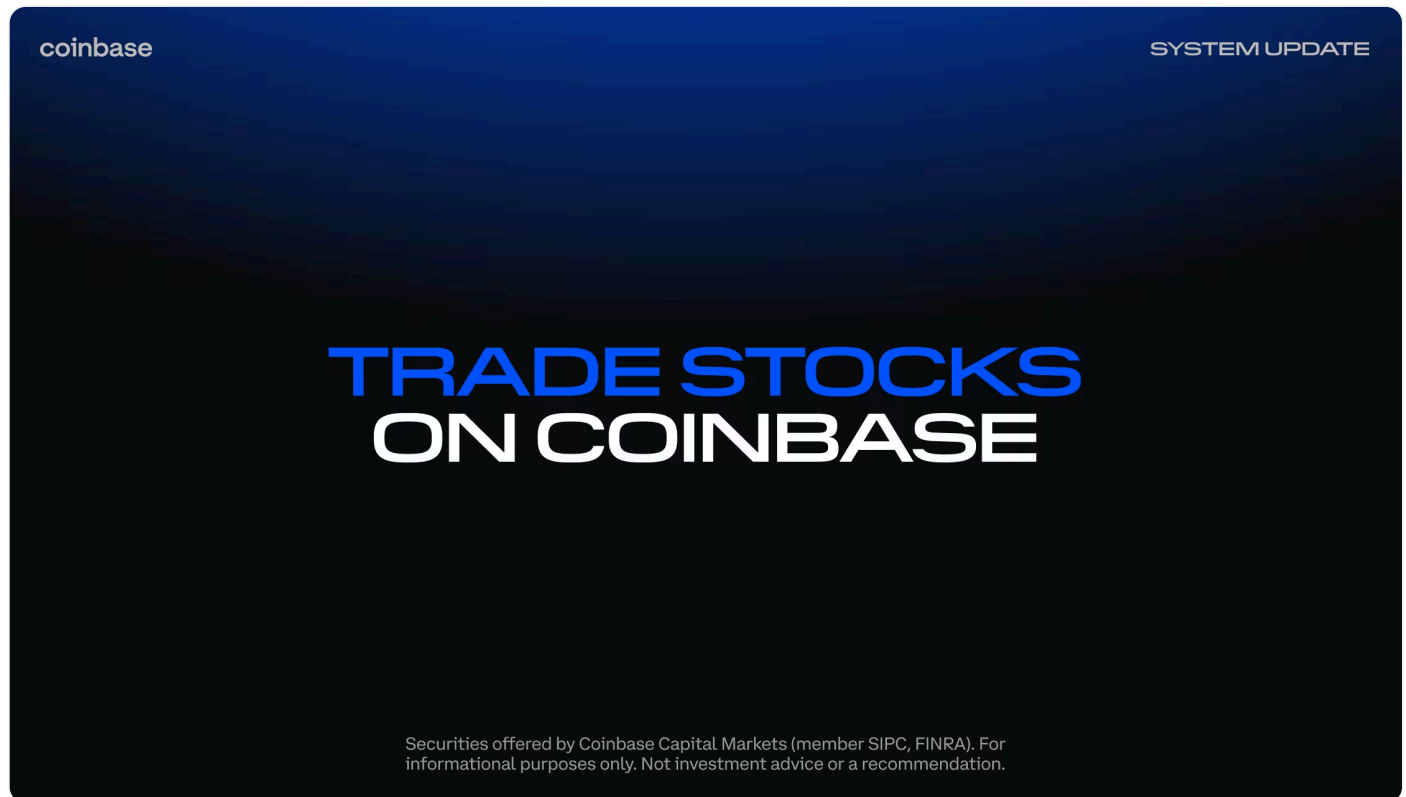

A graphic with a glowing blue rounded rectangle in the center of a dark blue background. Inside the rectangle, the word 'coinbase' is in small white lowercase letters, followed by 'SYSTEM UPDATE' in large, bold, white uppercase letters, and '[12.17.25]' in smaller white uppercase letters at the bottom.

coinbase
**SYSTEM
UPDATE**
[12.17.25]

Последние тринадцать лет Coinbase работает над созданием новой финансовой системы. Она будет работать постоянно, станет более эффективной и доступной для всех, что приведет к большей экономической свободе во всем мире. Сегодня мы делаем важный шаг на пути к тому, чтобы стать универсальной биржей, — мы значительно расширяем список активов, доступных для торговли на Coinbase, включая новые криптовалюты, акции¹, бессрочные фьючерсы и рынки предсказаний.² Наша цель — создать для розничных пользователей, организаций и разработчиков полноценный и удобный опыт взаимодействия с новыми активами, от торговли и инвестирования в новые активы до создания и проведения транзакций в блокчейне.

Это следующая эволюция Coinbase.

Торговля акциями и токенизация

Coinbase сокращает разрыв между традиционными инвестициями и криптовалютой, внедряя биржевую торговлю в наш основной торговый опыт. Сегодня мы начинаем внедрять биржевую торговлю для пользователей Coinbase в Соединенных Штатах.¹ Теперь вы сможете покупать, продавать ведущие акции и ETF и управлять ими вместе со своими крипто-портфелями – за доллары США или USDC - и все это в одном приложении и учетной записи Coinbase. Эта интеграция является ключом к нашей миссии Everything Exchange и упрощает управление портфелем, позволяя вам диверсифицировать свои инвестиции и получить доступ как к традиционным, так и к цифровым активам в одном месте.

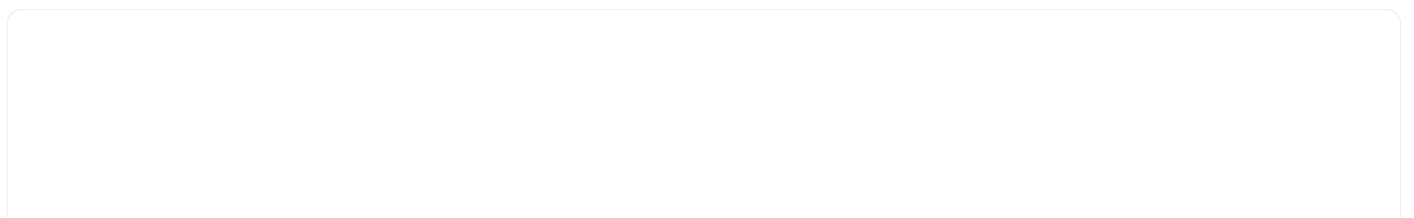

Трейдерам смогут торговать без комиссии в любое время, а не только в часы работы традиционных рынков. Торгуйте своими любимыми акциями 24 часа в сутки, пять дней в неделю.² В ближайшие месяцы мы планируем добавить тысячи новых акций. Подробнее об акциях на Coinbase можно узнать [здесь](#).

Каждый заслуживает возможности мгновенно реагировать на отчеты о доходах, макроэкономические события и новости выходных дней на мировых рынках. В начале следующего года мы также планируем расширить ассортимент бессрочных контрактов на акции, чтобы трейдеры за пределами США могли круглосуточно и без выходных инвестировать в американские акции через тот же простой интерфейс Coinbase.

If the future of finance is onchain, then so is the future of stock trading. In time, we believe everything will be tokenized, and bringing stocks to Coinbase is an important milestone toward enabling tokenized stocks. With tokenized stocks, you'll be able to trade 24/7 anywhere in the world, use the stocks you own onchain, and even make instant payments.

To begin down that path, we plan to launch Coinbase Tokenize, our new end-to-end institutional platform for tokenizing real-world assets. Tokenize will bring together all the necessary infrastructure to power access to tokenized stocks on Coinbase. Stay tuned early next year for updates.

Prediction Markets

TRADE PREDICTION MARKETS ON COINBASE

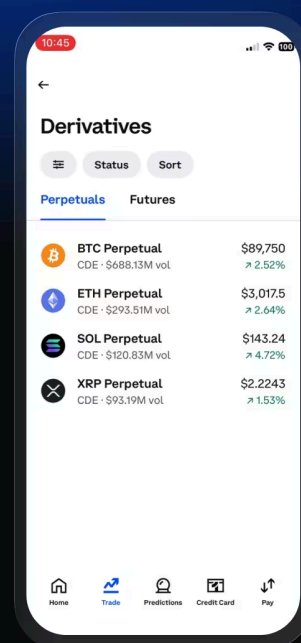

Today, we also began rolling out access to prediction markets on Coinbase in the United States.³ You will soon be able to trade on the outcomes of real-world events like elections, sports, collectibles, and economic indicators, with prices of the event contracts determined by the collective trading activity of market participants. All market flow will come from Kalshi at launch.

This offers a unique way for Coinbase users to engage with global events, whether you're forecasting the next big political shift or the outcome of a championship game. You will be able to manage your prediction market positions alongside your existing crypto, equities, and cash balances in the same trusted, simple, and unified interface you know. Read more about it [here](#), and begin trading your predictions with as little as \$1 in USD or USDC.

A wider marketplace for predictions creates an avenue for more informed trading activity, and we plan to support contracts from additional prediction market platforms in the coming months.

Futures and Perpetual Futures Trading

Trade futures on Coinbase

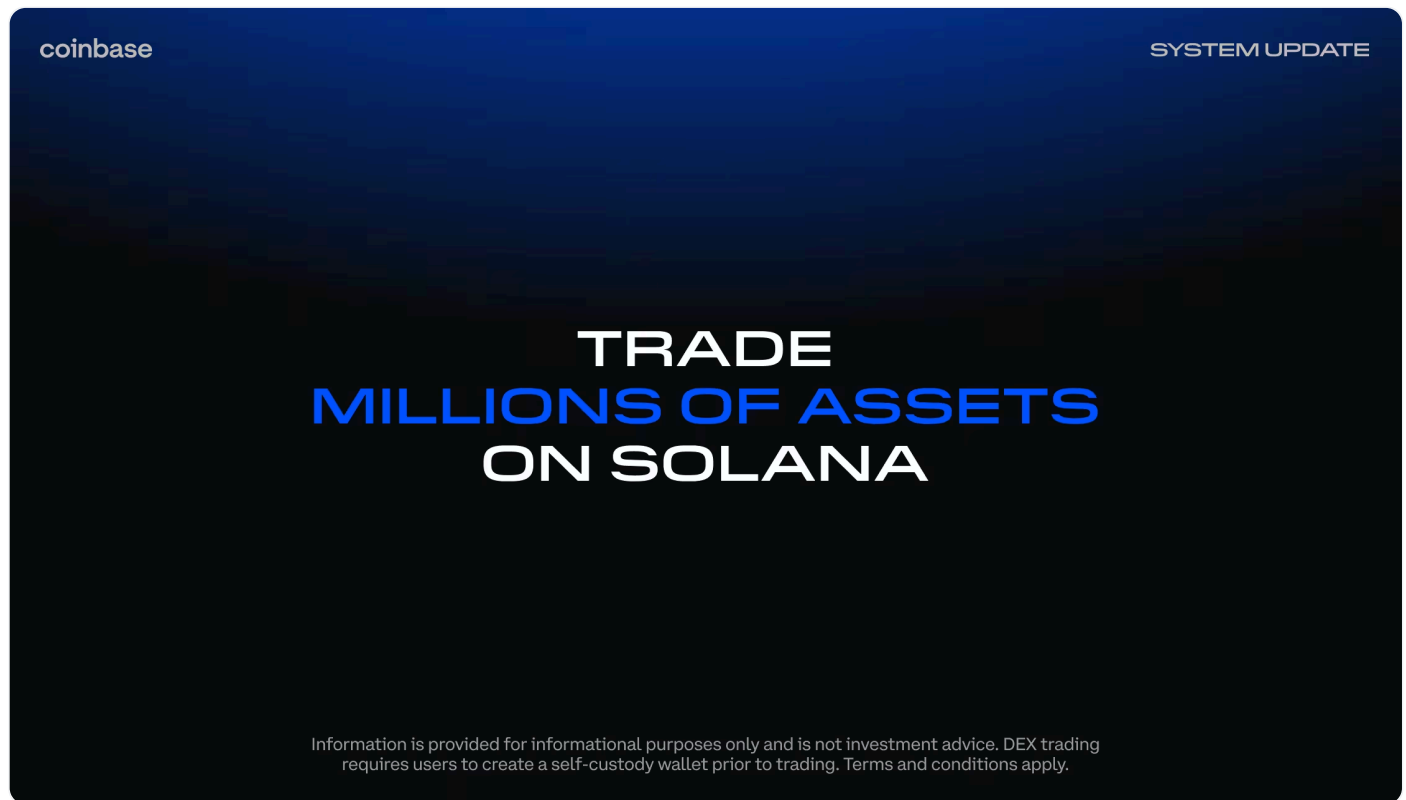

Listed futures and swaps are offered via Coinbase Financial Markets ("CFM"), a NFA member firm. Crypto offered by Coinbase Inc. For informational purposes only. Not investment advice or a recommendation.

For the last several years, we have worked to build a robust derivatives trading platform via Coinbase Advanced, offering dozens of unique contracts and being the first to provide perpetual futures in the U.S.

This week, we're bringing these advanced financial tools into the hands of millions in the United States by rolling out a new, simplified trading experience in the Coinbase app.³ It's easier than ever to start trading futures and perpetual futures on Coinbase. Make bigger moves with less upfront capital, and take advantage of more favorable tax benefits when trading across crypto markets and commodities, all on a streamlined interface that makes trading derivatives as easy as buying bitcoin. Learn more [here](#).

Solana DEX Trading

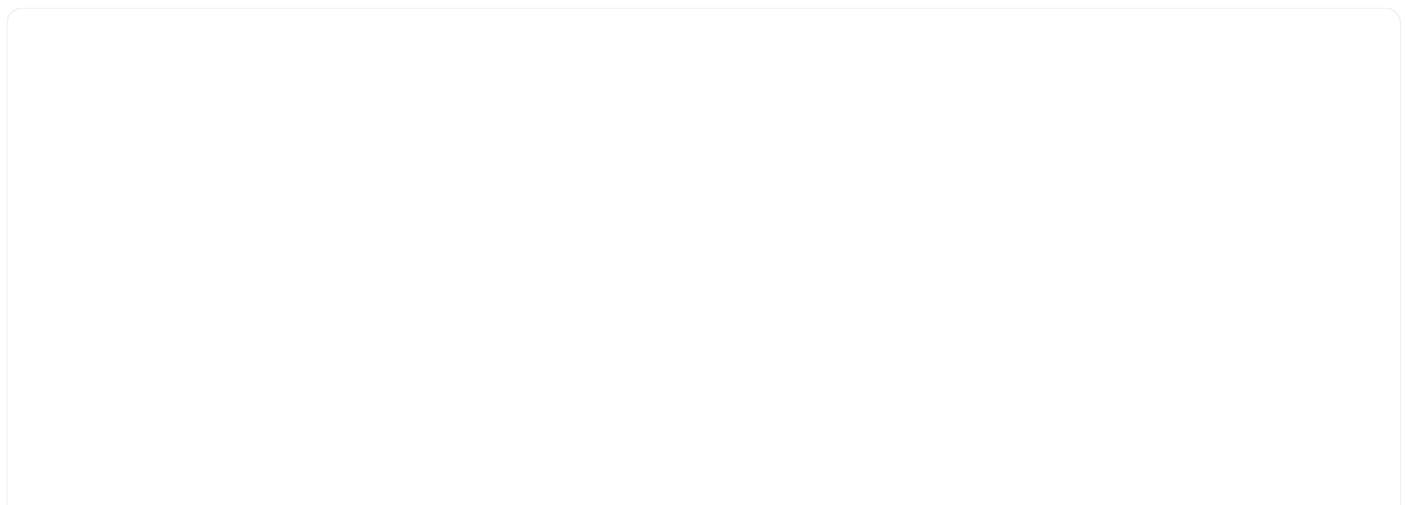

We asked you to stay tuned for Solana. It's time.

Coinbase is expanding its DEX trading integration to include access to Solana tokens.⁴ Rolling out over the coming weeks, you will be able to trade millions of tokens on one of the fastest and most cost-efficient blockchains, from the moment they launch, directly in the main Coinbase app. To enable a simple and seamless trading experience, we're integrating Jupiter – Solana's leading DEX aggregator – directly into Coinbase, so you can swap tokens securely without ever leaving the app.

We're determined to offer a far wider range of assets to traders, as well as greater exposure for onchain builders, and this is just another step in that direction. With millions of assets on Base and Solana now available in the main Coinbase app, we'll continue expanding to further networks over time. Explore the vast possibilities of DEX trading on Coinbase [here](#).

Coinbase Business is Here

Today, Coinbase Business becomes available to all eligible businesses in the U.S. and Singapore.

Coinbase Business is the all-in-one financial platform designed for startups and small businesses to tackle their operations with the speed, reach, and efficiency of crypto. We are empowering users to send and receive payments globally with payment links and invoices, manage crypto assets via Coinbase Advanced, earn rewards on USDC they hold, and automate financial workflows with access to Coinbase's regulated infrastructure. And soon, businesses will get the same trading experience rolling out on the Coinbase retail platform, allowing businesses to hold and swap hundreds of different cryptocurrencies, stocks, and every token they need.

Interested businesses can submit a no-fee, self-serve application with approvals in as little as two days. Learn more [here](#).

Coinbase Advisor

Coinbase Advisor

We believe the future of finance is automated, intelligent, and accessible to everyone. Today, we are taking a major step toward that future with Coinbase Advisor, our new AI-powered advisor for financial management directly in the main Coinbase App.⁵

Coinbase Advisor bridges the gap between idea and execution. Instead of manually piecing together trades, users can simply tell the AI their goals and questions – “Build me a portfolio,” “What’s the latest market news and how does it impact me?” – and get a personalized answer with recommendations powered by the products, data, and tools available on Coinbase.

We’re building towards a future where high-quality financial guidance isn’t a luxury product, but a standard for everyone. Coinbase Advisor eliminates much of the manual work of portfolio management and the fear of navigating the investment world alone.

Beta access for Coinbase Advisor is rolling out to early users. Learn more [here](#).

The Base App is Available to Everyone, Everywhere

The new Base App is officially available in more than 140 countries.

The Base App is an onchain everything app. It brings social, trading, payments, app discovery, and earning into one place. By bringing this all together, the app becomes a place where value flows through everything you create, share, and earn.

Until now, that value has been mostly captured by platforms instead of the people creating it. In the Base App, you own what you create and earn from what you do.

Content in the Base App is tokenized and tradeable and value is set in an open market. This means your posts and creativity can become real assets you control.

At the center of the app is a new social feed that's the 'for you' page of asset discovery. Discover content, coins, creators, and communities, and then trade in just a few taps. Follow top traders, get notified when they create content or make trades, and copy their moves.

The Base App turns scrolling into earning. We believe the future of the internet is built on Base, and the Base App is a key part of how we get there.

Learn more about the Base App [here](#).

Building the Future of Payments

Coinbase's Developer Platform now has a full suite of capabilities centered around the four pillars where we see the most adoption and most exciting use cases: custody, payments, trading, and stablecoins.

Scaling fintech companies like Deel, Routable, Papaya, and dLocal are excited to build great products for their customers using our Payment APIs.

We also make it easy to embed self-custodial stablecoin wallets into any platform, enabling your customers to seamlessly pay in stablecoins at checkout. Shopify has already launched stablecoin checkout, and payment service providers like Checkout.com and PPRO are excited to launch with us in 2026.

Today we're also announcing that you can create your own custom-branded stablecoin with Coinbase, backed by flexible collateral, including USDC. Coinbase Custom Stablecoins offer: the ability to embed your brand in every transaction; rewards on balances with

best-in-class economics; and a seamless issuance process managed by Coinbase. We are excited to work with innovative partners like Flipcash, Solflare, and R2 who are exploring the launch of Custom Stablecoins for their customers in the coming months.

Finally, we recently launched x402, an open internet standard that makes it easy to attach a stablecoin payment to any web request – it enables AI agents to pay for content and execute transactions using stablecoins. In the past 30 days, the protocol has enabled over \$200 million of annualized transactions. Next, we're working on developing the x402 Foundation with Cloudflare and other partners to further the development of the standard.

We're working hard to build the infrastructure needed to bring every company, from the smallest startup to the largest bank, onchain.

+++

This is a defining moment in Coinbase's journey, as we double down on our mission to create the Everything Exchange and an all-encompassing financial platform for all. We are rewriting the manual for how people and businesses manage their finances, by bringing all the benefits of crypto to all the world's assets and payments, all in one place.

Coinbase now gives consumers, traders, creators and businesses the tools they need to take full command of their financial futures, making Coinbase the most trusted place for them to earn, spend, and save across every asset class.

The system is updating. Are you tuning in?

DISCLOSURES

¹Securities are offered by Coinbase Capital Markets Corp, member FINRA /SIPC (<https://www.sipc.org>). Securities services offered by Coinbase Capital Markets Corp are separate from digital asset services provided by Coinbase Inc., and any affiliates. SIPC does not apply to digital assets or cash held in your Coinbase Inc. account. Additional information about your broker, Coinbase Capital Markets Corp, can be found on FINRA's BrokerCheck (<https://brokercheck.finra.org>). Execution, clearing and custody of all securities are provided by Apex Clearing Corporation. Stocks rollout has begun; coming soon to all U.S. users.

Cryptocurrency services offered by Coinbase Inc. (NMLS# 1163082). Coinbase Inc. is licensed to engage in virtual currency business activity by the New York Department of Financial Services.

²Extended hours (24/5) available for eligible symbols; reduced liquidity and wider spreads may occur.

³Listed futures and swaps are offered via Coinbase Financial Markets ("CFM"), a NFA member firm. Spot accounts are maintained by Coinbase Inc., which is not CFTC registered and is not a member of the National Futures Association ("NFA").

Trading in futures involves substantial risks. You should only trade in financial products that you are familiar with and understand the associated risks, and after carefully considering whether such trading is suitable in light of your investment experience, financial position, and investment objectives. Leverage in futures trading can work for you or against you. The risk of loss using leverage can exceed your initial investment amount. Prediction markets rollout has begun; coming soon to all U.S. users.

⁴DEX trading requires users to create a self-custody wallet prior to trading. Terms and conditions apply. DEX is offered by Coinbase Bermuda Technologies Ltd.

⁵Coinbase Advisor is an automated guidance and education tool that uses AI and Coinbase data. Outputs may be inaccurate or incomplete and should not be your only source of information. See applicable terms and risk disclosures to learn more.
