

Blockchain.com Summary of Commercial Policy & Fees Disclosure

Our fees are reviewed regularly to ensure fairness, transparency, and alignment with market conditions. The most current fee information is always available on the Blue Cube (Malta) platform.

The following information is made available to customers in accordance with Article 66 of Regulation (EU) 2023/1114 (MiCAR).

Fees for cryptoasset deposits & withdrawals.

Blue Cube (Malta) Limited ("Blockchain") will not charge a fee in regards to crypto-asset deposits.

Blockchain will charge a processing fee for clients withdrawing their crypto-assets. The processing fee comprises the below components. It is shown as a single fee to users prior to initiating a withdrawal.

(i) Network fees are estimated based on real-time blockchain data and may vary slightly upon execution;

(ii) a maintenance fee which is a fee charged to cover the cost of providing hot and cold wallet infrastructure to its custodial customers; and

(iii) a margin, which is a fixed amount which is calculated on a progressive basis depending on the amount withdrawn, with a lower percentage being charged for higher withdrawal amounts. Withdrawals on Polygon, Base, Optimism, Arbitrum, Solana or Tron are charged a flat fee of 0.05 USD. Otherwise, the manner in which this component scales is illustrated below:

Margin Fee Scaling	
Range (USD equivalent)	Fee (USD)
0 - 10	0.50
10 - 50	1.50
50 - 100	3.00
100 - 250	4.50
250 - 500	6.00
500 - 1000	7.00
1000 - 10,000	9.00
10,000+	10.00

(iv) The total fee will be displayed before transaction confirmation and deducted automatically upon completion.

Fees for bank deposits and withdrawals

Blue Cube (Malta) Limited

Blockchain will not charge a fee in relation to bank transfers from a client to the Firm in order to purchase crypto-assets.

Blockchain will charge a fee for a client instructing a bank transfer to the client's personal bank account, as detailed below -

	FPS (GBP)	SEPA (EUR)	Wire (USD)
Deposit Fee	Free	Free	Free
Withdrawal Fee	£0.50	€0.50	\$25

Transaction fees

Blockchain charges a fee in connection with each buy, sell, and swap transaction. The fee comprises the following, and may vary based upon a customer's desired order size:

(b) a Platform Processing Fee, designed to cover the costs associated with providing the necessary infrastructure, such as technology systems, security measures, liquidity execution, and operational support, all of which are essential for enabling and securely processing transactions on the platform.

(b) a Card Processing Fee, charged only when a customer utilises a payment card for purchases (subject to their bank or credit institution's fraud and risk approval of such transactions), designed to cover costs associated with payment card purchases which are processed by third-parties. For clarity, this Fee represents the amount passed to third-party processors.

(c) a Margin Fee (or "Spread"), which is the difference between the wholesale price at which Blockchain purchases its crypto-asset portfolio and the price at which it sells crypto-assets to individual customers. The spread is included in the quote price so customers can see the total cost of crypto-assets, prior to making a purchase.

(d) The total fee will be displayed before transaction confirmation and deducted automatically upon completion.

Order Size (EUR)	Platform Processing Fee	Card Processing Fee (if applicable)	Buy Spread (Non-EMT)	Sell or Swap Spread (Non-EMT)	Buy/Sell/Swap Spread (EMT)
<25	0.49 EUR	2.00%	1.50%	3.00%	0%
25 - 150	0.99 EUR	2.00%	1.50%	3.00%	0%
150 - 20,000	1.49%	2.00%	1.50%	3.00%	0%
>20,000	0.99%	2.00%	1.50%	3.00%	0%
