DBTA Beyond LLMs Report: Using Knowledge Graphs to Make GenAI Reliable

Generative AI adoption is rising fast across the enterprise, but most organizations are struggling to translate that momentum into real business outcomes. The challenge isn't model performance. It's the lack of trusted, enterprise context.

This report explores how leading organizations are overcoming this gap by combining GenAI with knowledge-centric architectures, bringing together data, rules, and decision logic to power more accurate, explainable, and actionable AI.

You'll learn how to:

- Ground GenAI in trusted business context to reduce hallucinations and risk
- Enable intelligent decisioning with governed data and reusable knowledge assets
- Scale AI initiatives with transparency, consistency, and control
- Deliver faster, more reliable outcomes across customer engagement, operations, and compliance

If you're looking to move beyond experimentation and unlock enterprise-grade AI that drives measurable impact, this report provides a practical roadmap.

Download the report to discover how context-driven, decision-centric AI can turn GenAI into a true business advantage.
