Why Participate

Automate a real use case from your practice

Test-drive the full-featured Flow Conductor enterprise edition for free

Co-design the product roadmap and influence pricing

Facilitate supported requirements when the functionality becomes generally available

Our Commitment

Two-month direct collaboration with our product team

Regular progress calls, including tailored onboarding and feedback

Hands-on support from a dedicated Solution Architect

Priority consideration for general availability

Orchestrate Data and AI Workflows with Less Code

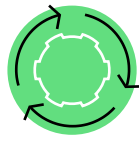

Build workflows that are *grounded* in your data, *observable* step by step and ready to run *at scale* across teams.

Flow Conductor is a visual low-code builder to orchestrate end-to-end AI and data workflows for agents, ingestion, enrichment and consumption.

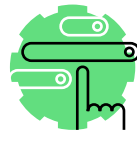

Intuitive

Save time designing workflows with a drag-and-drop interface. Add triggers for ingestion, schedule bulk writes, define transformation & enrichment steps and add custom logic when needed.

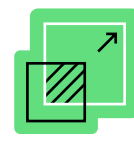

Repeatable

Move away from one-off scripts and third-party integrations to multi-step, reusable workflows. Start with a template, adjust it to your needs and standardize across systems.

Manageable

Gain full workflow visibility and control, see results instantly and spend less time on maintenance. Easy to monitor, debug and customize with GitHub versioning, audit logs and role-based access control.

Extensible

Natively integrate MarkLogic® software with Progress® Semaphore™ and Corticon® platforms, while connecting to 500+ enterprise apps. Add new sources and export to more systems with minimal effort to support new use cases.
