ПОЧЕМУ КОМАНДЫ БОРЮТСЯ

Один вопрос. Несколько инструментов. Никакой ясности.

СВЯЗЬ

Вход

Закажите демо-версию

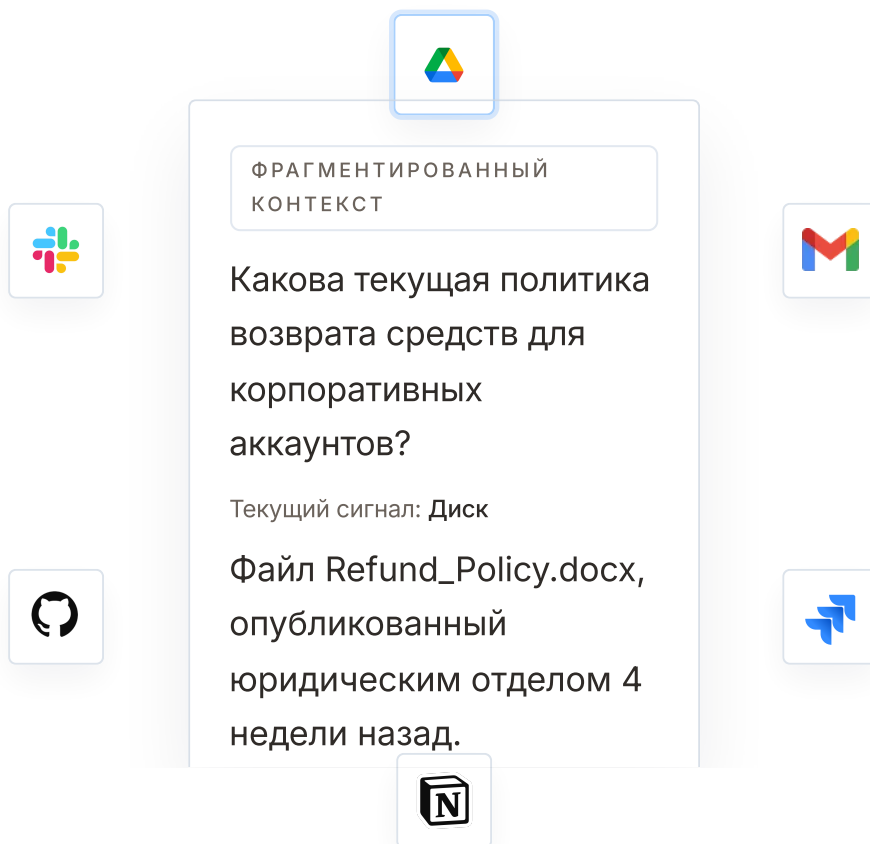

Сотрудник службы поддержки спрашивает о последних правилах возврата средств. Ответ есть, но он разбросан по разным источникам: документу на Google Диске, переписке по электронной почте, тикету в Jira, странице в Notion, слиянию в GitHub и сообщению в Slack. Каждый из них частично верен. Ни один из них не дает полной картины.

В каждом приложении есть фрагмент, но нет полного ответа

Команды ежедневно выполняют один и тот же поиск в шести инструментах

Используется устаревшая информация, потому что последняя версия скрыта

Так выглядела работа до появления Linkence

НАШИ ПРОДУКТЫ

Один мозг — два продукта

Linkence выполняет операционную работу, связанную с обоими продуктами, чтобы ваши сотрудники могли сосредоточиться на отношениях и решениях, которые требуют их участия.

Рабочее пространство

Поддержка

Workspace AI

Ваш ИИ-помощник для внутренней работы. Он запускает повторяющиеся отчеты, отслеживает блокирующие запросы, создает черновики документов и выполняет утвержденные действия в Gmail, Slack, Google Диске и Jira, чтобы ваша команда перестала выполнять операции вручную.

[Подробнее о Workspace AI](#)

Построенный для

Ops, RevOps и HR в командах от 50 до 500 человек

Инженерные команды быстрее вводят в курс дела новых сотрудников

What it runs for you

Answers grounded in your real company data

Reports and Excel exports from connected sources

Scheduled automations for recurring work

Centralized administration for recurring items
Approval-gated actions across business tools
Bring your own model across leading
SSO, RBAC, audit logs, and permission controls

SECURITY & COMPLIANCE

Built for teams that need trust before adoption.

We are DPIIT recognized and VAPT certified, with ISO 27001 and SOC 2 compliance milestones underway.

Hear from our customers

Trusted where judgment matters.

What I value most is the judgment. Linkence knows when to reply, when to hold back, and when to escalate back to human. It treats sensitive customer conversations the way a senior teammate would. That is a hard thing to trust a product with, and they earned it.

Nirav Solanki

Founder, Ekayan

Put recurring work on autopilot.

Save any prompt as an automation. Linkence runs it on your schedule and delivers the finished output for review.

 Independently benchmarked

The world's most accurate retrieval engine.

On the public Open RAG Bench dataset, Linkence surfaced the right context 96.6% of the time, well ahead of reranker and vanilla RAG pipelines.

 [View the full benchmark on GitHub ↗](#)

%

Direct retrieval accuracy

+15.6 pts higher than the next best pipeline

96.6%

Linkence

81%

Reranker RAG

78%

Vanilla RAG

 Self-improving

And it keeps getting sharper. Accuracy climbs over time as your team corrects, approves, and adds sources, with no retraining required.

Proof that Linkence pays for itself.

Powered by a world class AI architecture that outperforms RAG at every task,
Linkence is the only AI Platform you'll ever need.

Linkence knows your business. Nobody else does.

Your data never leaves your control. We never train on it. You can delete everything, anytime.

Audit logs and monitoring

Track every query and action with live, searchable logs for accountability and incident review.

Your data never trains AI

Your data is never used to train models. Provider-side data retention is disabled wherever the provider supports it, and you can bring your own model keys for full control.

Bank level encryption

Your data is encrypted in transit with TLS and at rest, and credentials are protected

with AES-256 application-layer encryption,
 СВЯЗЬ
the same standard banks rely on.

You're always in control

Linkence drafts and recommends actions,
but nothing is sent without your approval.
Disconnect anytime to trigger immediate
deletion of your data.

AI guardrails and human in the loop approval

Define policy guardrails for AI behavior and
require explicit human approval before
sensitive actions can run.

Granular permission controls

Choose exactly which emails, calendars, and
connected tools can be accessed. Revoke
permissions instantly from your admin
dashboard.
