

РЕШЕНИЯ

The fastest way to AI-native.

Настраиваемые решения на основе искусственного интеллекта, которые повышают продуктивность организации и увеличивают прибыль.

Организации по всему миру используют Mistral

ПОВЫШЕНИЯ ЭФФЕКТИВНОСТИ И ТОЧНОСТИ.

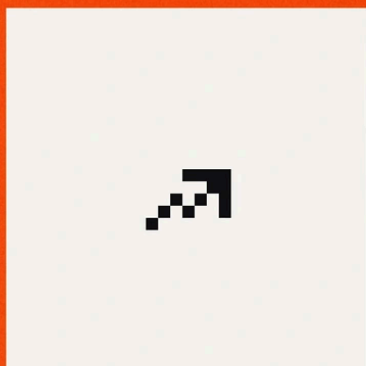

По команде

Нам доверяют команды компаний любого размера.

Продажи и маркетинг.

Повысьте рентабельность инвестиций в маркетинг с помощью создания контента на основе искусственного интеллекта и оптимизации рекламных кампаний. Создавайте привлекательные тексты, анализируйте рыночные тенденции и выявляйте наиболее перспективных клиентов, сохраняя единство бренда во всех маркетинговых каналах.

Продукт и инжиниринг.

Ускорьте разработку с помощью искусственного интеллекта для написания и тестирования кода. Наши решения — от интеллектуального автодополнения кода до автоматической генерации документации — помогают командам разработчиков писать более качественный код быстрее, сохраняя полный контроль над процессом разработки.

Риск и соответствие требованиям.

Автоматизируйте управление рисками и соблюдение нормативных требований с помощью мониторинга на основе искусственного интеллекта. Внедряйте передовые модели для модерации контента, соблюдения политик и выявления мошенничества, сохраняя при этом соответствие нормативным требованиям и операционную эффективность.

Служба поддержки клиентов.

Преобразите клиентский сервис с помощью интеллектуальных решений на основе искусственного интеллекта. Используйте продвинутых чат-ботов и автоматизированные системы для эффективного решения запросов, классификации заявок и анализа клиентов, чтобы сократить время ответа и операционные расходы.

Operations.

Maximize operational efficiency through AI-powered automation. Streamline workflows, optimize resource allocation, and gain real-time performance insights to enable data-driven decision-making across your organization.

Trusted by organizations across all industries.

Financial services.

Power your financial operations with enterprise-grade AI solutions trusted by leading banks and insurers. BNP Paribas leverages our models across global markets, sales, and customer support, while AXA empowers 140,000+ employees with secure AI capabilities for text generation and analysis. Our solutions drive innovation while maintaining strict compliance and security standards.

[Learn more](#) ➔

Healthcare.

Transform healthcare delivery with AI solutions trusted by industry leaders. From Synapse Medicine's evidence-based recommendations serving 300+ hospitals to

Manufacturing and logistics.

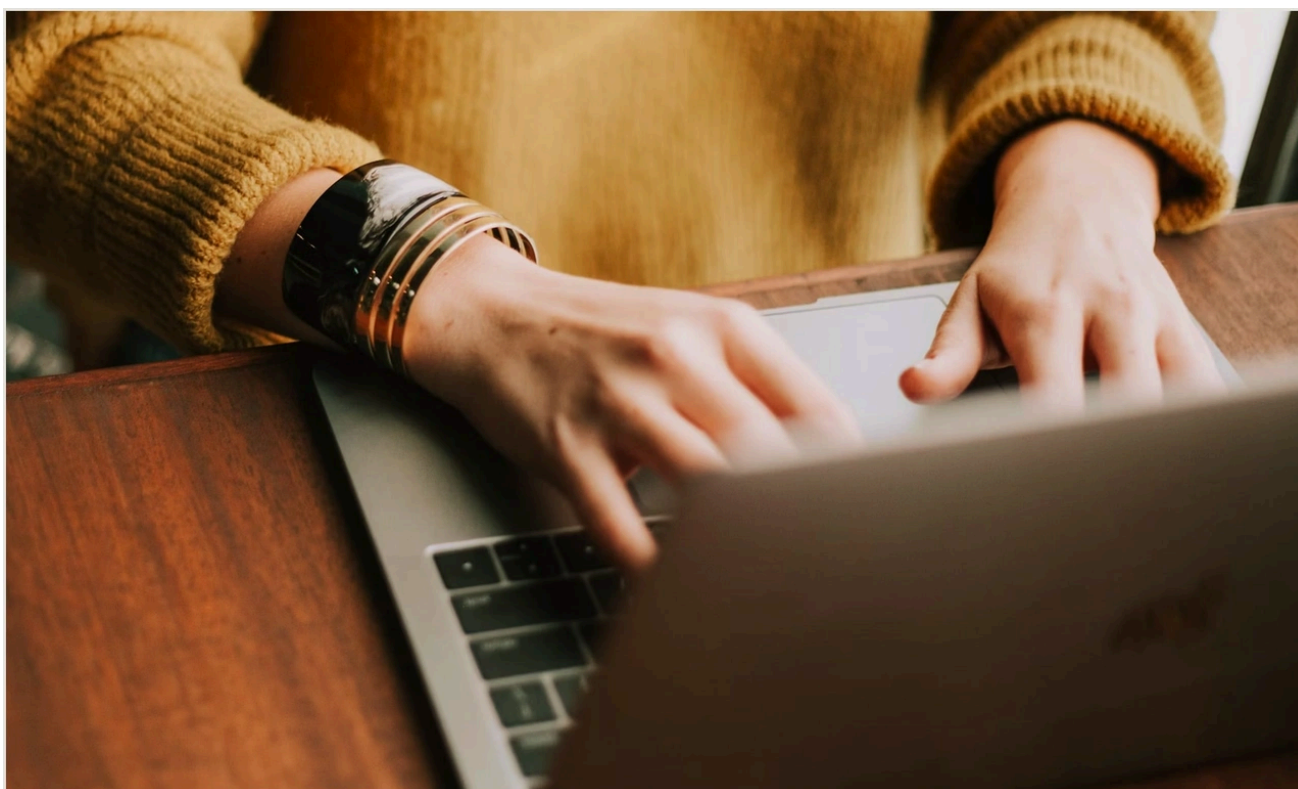

Revolutionize supply chain operations with AI solutions proven at global scale. CMA CGM's deployment of MAIA, CMA CGM's internal personal assistant powered by Mistral, demonstrates how our technology enhances workforce productivity across 160 countries for 155,000+ employees.

[Learn more](#) ➔

eCommerce.

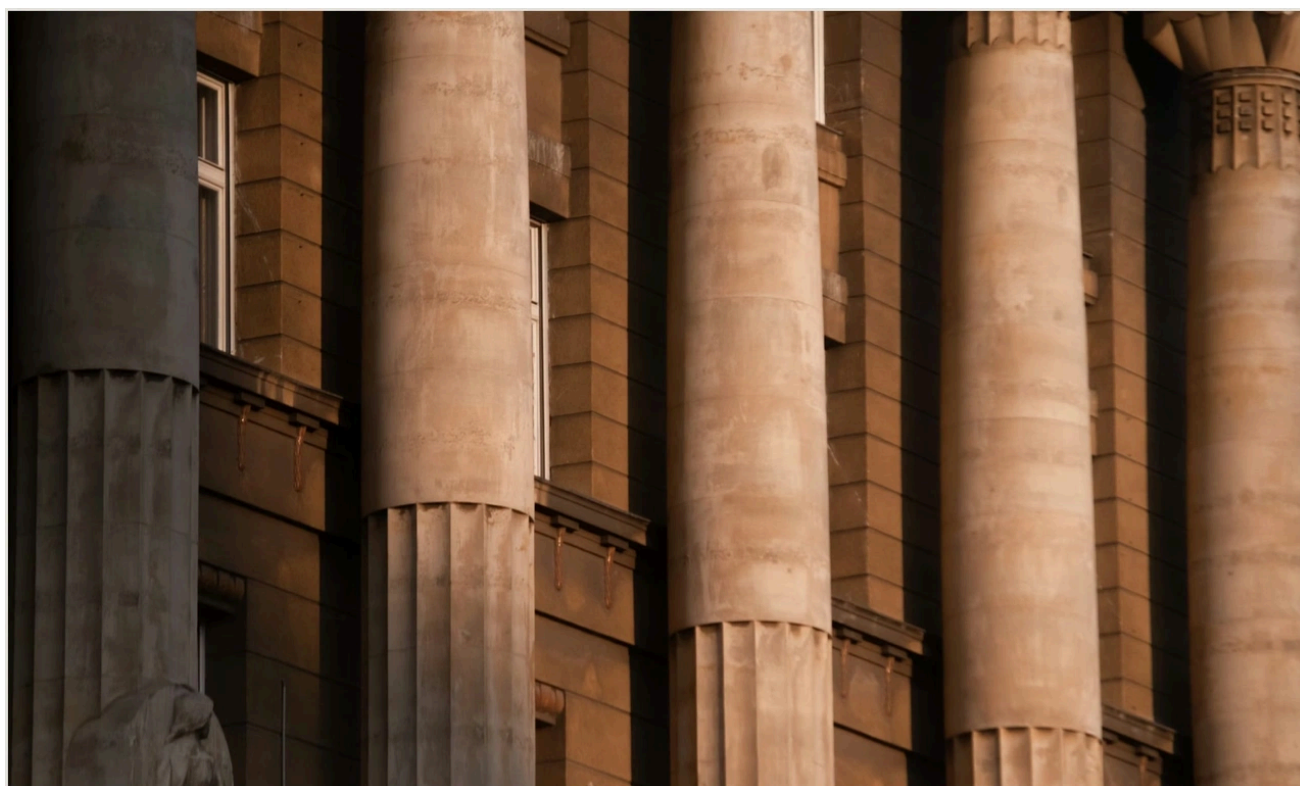

Scale your digital retail operations with AI solutions trusted by European leaders. From Zalando's personalized shopping experiences to Mirakl's automated catalog management processing 10M+ products monthly, our technology drives eCommerce innovation.

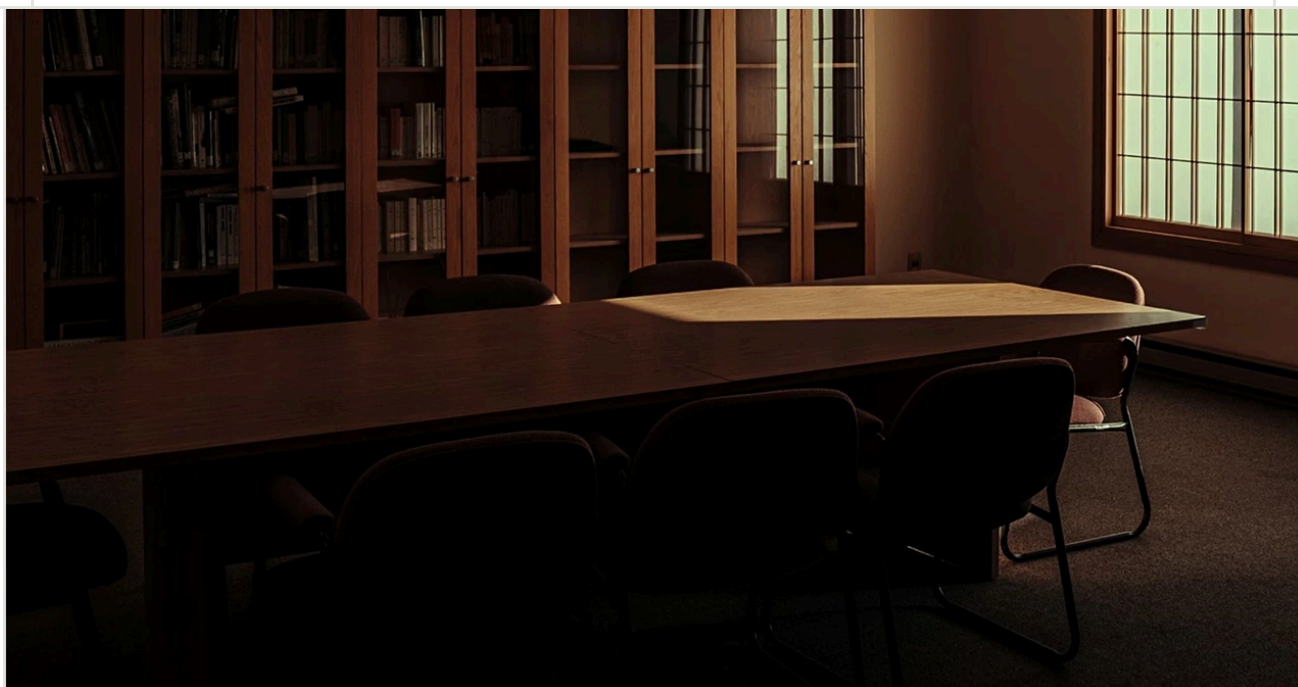

Modernize public services with secure, scalable AI solutions. France Travail's implementation showcases how our technology helps government agencies enhance service delivery through AI-powered data analysis and automated assistance.

Defense and intelligence.

Talk to us if you work in defense and security. Trusted by departments of defense in multiple countries, Mistral delivers sovereign AI solutions for operations critical to public safety. From edge deployments to specialized models, we enable comprehensive platform control, air-gapped security, and dedicated technical support.

Trusted to deliver for any use case.

From code generation to advanced reasoning, power your business with customizable AI models that scale.

Code generation.

Create and optimize code with customizable models designed for software development, from auto-completion to full function generation.

I need to set up a new project,
assign tasks to team members,
schedule a kick off meeting and
generate a progress report.

Advanced reasoning.

Build sophisticated AI applications combining powerful reasoning with extensive information access.

We are considering expanding our product line to include a new feature. What factors should we consider, and how should we evaluate the potential impact on our business?

Knowledge extraction.

Transform unstructured data into actionable insights with high-accuracy custom models.

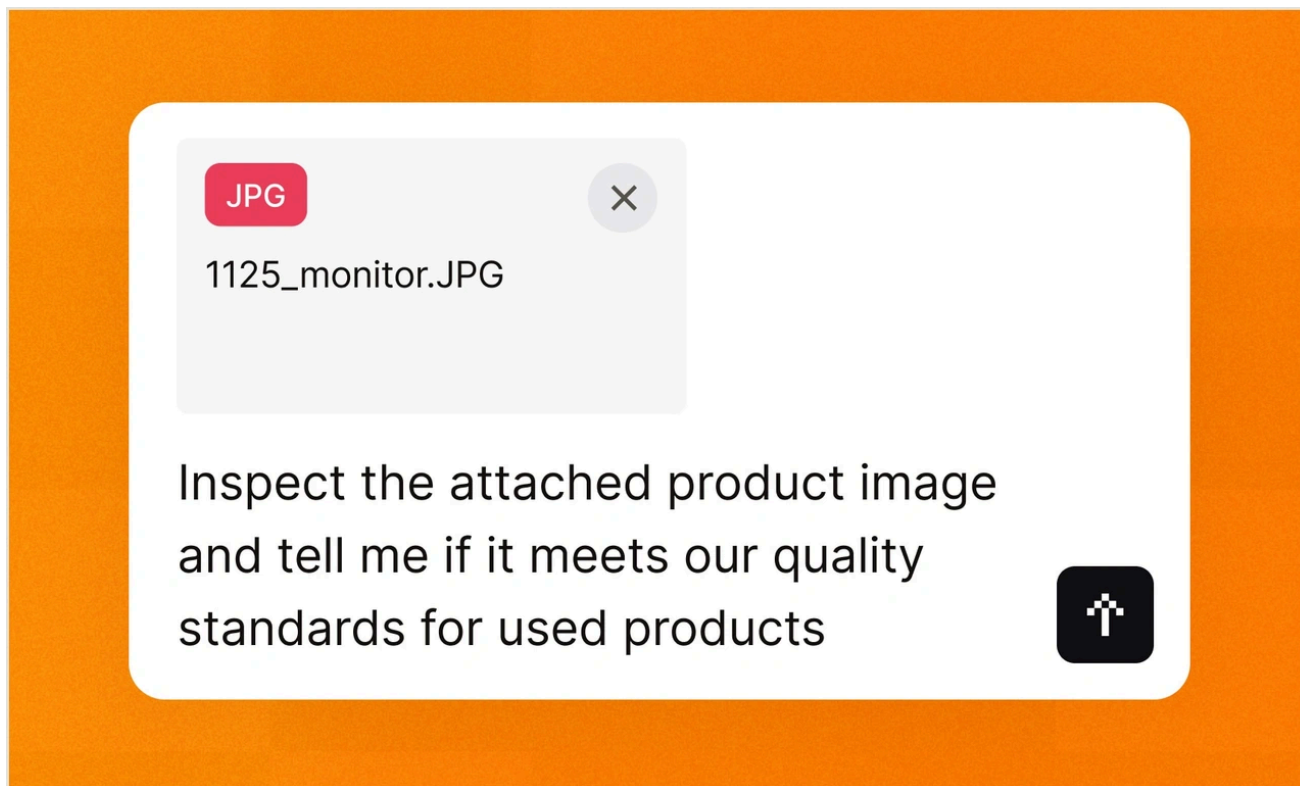

Can you extract the key financial metrics from our latest quarterly report and provide a summary?

AI at the edge.

Deploy AI capabilities wherever you need them including edge deployment, ensuring powerful AI experiences even in resource-constrained environments.

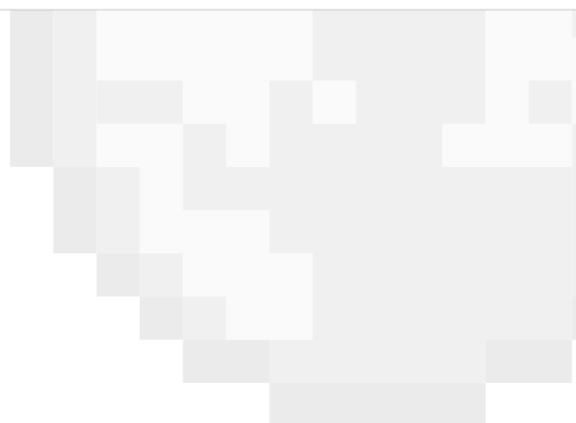

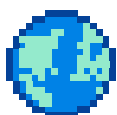

AI safety.

Develop AI applications with built-in safety controls to ensure responsible AI deployment while maintaining performance.

Generate a safety report of the attached audience interactions from my Discord channel.
