Начальный уровень

109 часов

Generative AI Fluency

This course provides a comprehensive high-level overview of Generative AI, beginning with foundational concepts and terminology and then delving into specific applications such as Large Language Models (LLMs) for text generation and diffusion-based models image creation. Key lesson...

КУРС

★ 4.8

Базовая компетентность

7 часов

AI Programming with Python

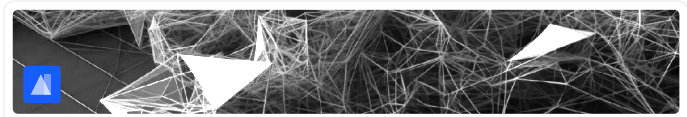

Develop a strong foundation in Python programming for AI, utilizing tools like NumPy, pandas, and Matplotlib for data analysis and visualization. Learn how to use, build, and train machine learning models with popular Python libraries. Implement neural networks using PyTorch. Gain practical...

ПРОГРАММА NANODEGREE

Начальный уровень

52 часа

Deep Learning

Build foundational skills in deep learning by designing and training neural networks to solve complex real-world problems. You'll begin with the essentials of neural networks, advancing to specialized architectures like Convolutional and Recurrent Neural Networks, along with Transformers, Generativ...

6 часов

Digital Marketing

Build job-ready digital marketing skills by learning from industry experts. Run live campaigns, analyze results, and apply proven techniques to engage audiences and strengthen brand performance in this comprehensive Nanodegree.

Data Engineering with AWS

Learn to design, build, and automate data systems on AWS. Start by modeling data across relational, document, and graph databases—PostgreSQL, MongoDB, and Neo4j—understanding the tradeoffs of each paradigm. Then build cloud data warehouses in Amazon Redshift, designing dimensional...

Business Analytics with Tableau

Dive into business analytics with this Nanodegree. Master Excel, SQL, and Tableau to analyze data, create interactive dashboards, and deliver insights that drive informed, impactful business decisions.

 ПРОГРАММА NANODEGREE  4.8

Начальный уровень 40 часов

Programming for Data Science with Python

Learn programming skills needed to uncover patterns and insights in large datasets by querying relational databases, analyzing data with Python, and using industry-standard data science libraries. Develop scripts to automate data collection, cleaning, transformation, and reporting tasks, while...

 ПРОГРАММА NANODEGREE  4.8

Начальный уровень 63 часа

Data Scientist

This advanced Nanodegree prepares you to tackle data science at scale. Work with AI best practices, build production-ready projects, and gain the confidence to lead data-driven solutions.

 ПРОГРАММА NANODEGREE  4.8

Продвинутый уровень 61 час

React

React is completely transforming the front-end development landscape. Master this powerful UI library and gain career-ready skills by moving from foundational components to professional-grade architecture. You'll begin by building declarative web user interfaces, mastering JSX, props, and...

 ПРОГРАММА NANODEGREE  4.7

Средний уровень 61 час

C++

Learn C++, a high-performance programming language used in the world's most exciting engineering jobs -- from self-driving cars and robotics to web browsers, media platforms, servers, and video games.

 ПРОГРАММА NANODEGREE  4.6

Средний уровень 42 часа

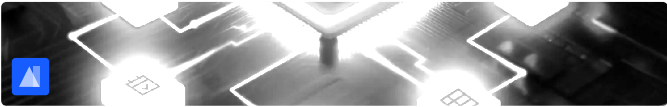

Data Structures and Algorithms

Sharpen your problem-solving skills in this Nanodegree program. Practice over 100 algorithm and data structure challenges, learn Python-based techniques, and prepare for interviews with mentor guidance and real coding scenarios.

 ПРОГРАММА NANODEGREE  4.7

Средний уровень 47 часов

Agentic AI

Go beyond single chatbots to engineer sophisticated, coordinated teams of AI agents. This Nanodegree guides you from advanced prompting techniques like Chain-of-Thought and ReAct to designing agentic workflows with patterns like Routing and Parallelization. You'll master building and...

 ПРОГРАММА NANODEGREE  4.8

Средний уровень 53 часа

Product Manager

Build job-ready skills for a successful PM career with this comprehensive Nanodegree program. Learn the fundamentals of product management from strategy planning to launch with expert guidance and hands-on projects.

 ПРОГРАММА NANODEGREE  4.7

Начальный уровень 50 часов

iOS Development with SwiftUI and SwiftData

Become skilled in developing high-quality iOS apps. This comprehensive Nanodegree program teaches Swift proficiency, UI design, data management, data integration, and project planning so you can take apps from idea to reality.

 ПРОГРАММА NANODEGREE  4.6

Средний уровень 76 часов

Generative AI

Ready to build production-grade AI? This program equips developers to deploy reliable generative AI solutions. We'll move past theory and focus on the proven implementation patterns you need. You'll master production essentials like model selection, cost estimation, and reliable prompt engineering t...

 ПРОГРАММА NANODEGREE  4.9

Средний уровень 56 часов

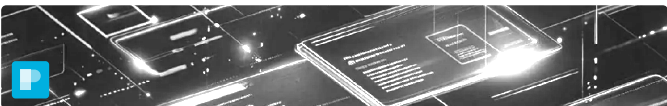

Backend Developer with Python

Build real-world web applications from scratch. This Nanodegree teaches full stack development using Flask, SQL, and Docker with a focus on APIs, security, and deployment skills.

 ПРОГРАММА NANODEGREE  4.6

Средний уровень 49 часов

Front End Web Developer

Launch your career in front-end development with this Nanodegree. Build professional web pages, optimize performance, and create interactive experiences using JavaScript, CSS, and modern web tools.

 ПРОГРАММА NANODEGREE  4.6

Средний уровень 39 часов

This Nanodegree program equips you to manage AI products from concept to launch. Learn AI integration, design custom datasets, and develop strategies for Generative AI. You'll create a PRD, build roadmaps, and explore LLMs in product strategies.

ПРОГРАММА NANODEGREE

★ 4.4

Средний уровень

18 часов

Break into UX with this beginner-friendly Nanodegree. Learn the full design process—from scoping and research to wireframing and testing—and graduate with a portfolio that showcases your UX thinking and skills.
