

ШЕСТЬ Швейцарских Бирж

Швейцарская биржа SIX (ранее **Швейцарская биржа SWX**), расположенная в [Цюрихе](#), является главной [швейцарской фондовой биржей](#) (второй по значимости является [биржа BX](#)). Швейцарская биржа SIX также занимается торговлей другими [ценными бумагами](#), такими как швейцарские [государственные облигации](#) и [деривативы](#), например [опционы на акции](#).

Швейцарская биржа SIX полностью принадлежит [SIX Group](#), непубличной компании с ограниченной ответственностью, владельцами которой являются около 120 национальных и зарубежных финансовых учреждений. ^[2]

В нынешнем виде биржа была основана в 1993 году в результате слияния [Женевской фондовой биржи](#), [Базельской фондовой биржи](#) и Цюрихской фондовой биржи в *Швейцарскую фондовую биржу* (в переводе с немецкого — «Швейцарская ассоциация фондовых бирж»), широко известная как *Швейцарская биржа*. ^[3] Новая ассоциация начала свою деятельность в 1995 году. Это была первая в мире фондовая биржа с полностью автоматизированной системой торговли, клиринга и расчетов.

В 1999 году ассоциация была переименована в SWX Swiss Exchange. ^[4] В 2002 году ассоциация была преобразована в [акционерное общество](#) под названием SWX Swiss Exchange AG. В июле 2004 года она отклонила предложение о слиянии с [Deutsche Börse](#), которое, по мнению аналитиков, могло быть выгодно для небольших компаний, зарегистрированных на SWX Swiss Exchange. В 2008 году Швейцарская биржа SWX объединилась с SIS Group и [Telekurs](#) в новую группу SIX и была переименована в SIX Swiss Exchange, под этим названием она работает до сих пор по состоянию на 2025 год.

Швейцарская биржа SIX Swiss Exchange рассчитывает несколько основных индексов. Самый известный индекс — SMI, или [Швейцарский рыночный индекс](#), в который входят 20 крупнейших и наиболее ликвидных компаний SPI. SPI, или [Швейцарский индекс эффективности](#), включает более 200 компаний, зарегистрированных на бирже и соответствующих требованиям. SLI, или [Швейцарский индекс лидеров](#), — это индекс с ограниченным составом, в который входят 30 крупнейших компаний. SBI, или [Швейцарский индекс облигаций](#), отслеживает обязательства, выпущенные в [швейцарских франках](#). [Рыночная капитализация](#) всех компаний, зарегистрированных на Швейцарской бирже SIX, в 2018 году составила 1,6 триллиона швейцарских франков, что делает ее одной из крупнейших бирж мира по капитализации. ^[5]

23 августа 2023 года компания создала [EuroCTP](#) в качестве совместного предприятия с 13 другими биржами, чтобы обеспечить [консолидированную ленту](#) для [Европейского](#)

союза в рамках [Союза рынков капитала](#), предложенного [Европейской комиссией](#).

История

Первые швейцарские биржи

Первые биржи в Швейцарии были созданы в крупных городах по всей стране с разрешения [кантональных](#) властей. [Женева](#) стала первопроходцем в 1850 году, когда было основано *Объединённое общество валютных агентов* (На английском: Объединенная ассоциация брокеров) был основан. Его [торговая площадка](#) была открыта в 1855 году и одобрена [Большим советом Женевы](#) в 1856 году.^[6] За [Basler Börse](#) последовала в 1866 или 1876 году (источники расходятся) в [Базеле](#), а также еще одна в [Цюрихе](#) в 1873 году.^[6] [Бернская биржа](#), которая существует до сих пор, была основана в 1884 году. Менее крупные биржи были созданы в [Лозанне](#) в 1873 году, в [Санкт-Галлене](#) в 1887 году и в [Нёшателе](#) в 1905 году.^{[4][6]} Кантоны облагали биржи [налогом на добавленную стоимость](#).^[6]

During the [First World War](#), all Swiss exchanges were closed, with the exception of [bond](#) trading in the Geneva exchange. The [depression of 1920–21](#) was followed by a bull market in the 1920s, during which a new exchange building (*alte Börse*, German for "old exchange") was constructed in Zürich at Bleicherweg 5, near [Paradeplatz](#). The building is still standing, but no longer used as an exchange.

After the [Great Depression](#) of the 1930s, a federal banking law was introduced. This law is still in effect today and, in its form as of

[p.com/exchanges/in dex_en.html](https://www.six.ch/en/exchanges/in dex_en.html)

2020, requires permission by the [FINMA](#) to do banking activities, as well as due diligence and [banking secrecy](#). An exchange law was also discussed, but not introduced. Finally, Swiss exchanges were required to unite under a securities exchange association in order to set up a registration office, so that the [Swiss National Bank](#) could have the desired influence.

Post-war era

After the [Second World War](#), banking fees for trades on exchanges were unified in a broker conference. In the middle of the 1950s, the revenues of the exchanges reached new highs as in times before or between the wars until 1929. This development continued until the [Kennedy Slide of 1962](#), which was triggered by measures against the economic slowdown, the New York crash, and the [Cuban Missile Crisis](#).

Following the [deregulation](#) and the termination of the [Bretton Woods System](#) (fixed exchange rates) by the [United States](#), in the 1970s, a fundamental transformation of the [economy](#) and of the financial landscape started, which is still ongoing today. Fluctuating exchange rates carried new risks for the economy and a need for [hedging](#) solutions arose. Finance [derivatives](#) were introduced as a response to this need and in 1973, the [Chicago Board Options Exchange](#) was created as an exchange that only handles derivatives. With the [oil crisis](#) of 1974, the economy went through the biggest after-war recession since 1931. In Switzerland, the oil shock led to such a rush on investment money that it was considered to close the exchanges.

New economy

The [Geneva Stock Exchange](#), the [Basel Stock Exchange](#) and the Zürich stock exchange merged into SWX Swiss Exchange in 1993.^[3] In 1995, SIX Swiss Exchange became the first stock exchange to fully automate trading, clearing, and settlement processes.^[7] On 16 August 1995, the closing bells rang for the last time on the trading floors, ending an era spanning more than a century. They were superseded with the world's first automated trading, [clearing](#) and [settlement](#) system.

After the international financial markets recovered from the [1997/1998 Asian crisis](#) and the [1998 Russian crisis](#), there was a period of two years of lasting bull market from October 1998. This bull market was mainly driven by the [new economy](#) boom and transition of this time. However, the boom was more limited on Swiss stock indices, since they are dominated by pharmaceutical, food and financial values, while Internet companies and technology companies play only a secondary role. Hence, it was only in May 2000 that the [Swiss Performance Index](#) crossed again the peak of 5,237 points that it had reached before the Russian crisis. It reached its then all-time high of 5,770 points on 23 August 2000. The bursting of the [dot-com bubble](#) sent stock prices

down worldwide, and did not spare Swiss stock indices. The SPI entered a bear market. It had lost more than 20% from its previous peak by 22 March 2001, on which day it reached a temporary bottom.

After a short recovery phase, the SPI started to erode continuously from May 2001. The [9/11 attacks](#) accelerated this evolution, started with the bursting of the dot-com bubble, further. The SPI reached its bottom of 2,603 points one and a half years later, on 12 March 2003, at the peak of the [SARS-epidemic](#) and the [Iraq war](#).

SIX Group

In May 2007, the SWX Group, the SIS Group and [Telekurs Group](#) announced their merger to a new [holding](#) called Swiss Financial Market Services AG.^[8] The merger was official in 2008 and the new company was renamed to [SIX Group AG](#).^[9] SWX Swiss Exchange was renamed to SIX Swiss Exchange in the same year.^{[10][11]}

Дочерние компании, поглощения и совместные предприятия

Eurex

С 1998 по 2012 год Швейцарская биржа SIX владела 15% акций [Eurex](#), второй по величине в мире биржи [фьючерсов](#) и деривативов после [Чикагской товарной биржи](#), вместе со своим немецким партнером [Deutsche Börse](#) (85%). В 2012 году Deutsche Börse выкупила 15% акций у Швейцарской биржи SIX,^[12] став ее единственным владельцем.

SWX Europe

SWX Swiss Exchange, as was its new name since 1999,^[4] acquired the stock exchange platform Tradepoint, renamed as [Virt-x](#),^[13] for the trading of 32 Swiss [bluechip](#) stocks, regulated by the British [Financial Services Authority](#).^[14] The new platform was opened on 25 June 2001.^[15] The main goals were on the one hand to build a pan-European exchange and on the other hand to mitigate the migration of the trading volume on [SMI stocks](#) to the [London exchange](#).^[16]

The listed companies were offered the choice between two market segments for SMI stocks: The EU-regulated market segment and the UK-exchange-regulated market segment. Both segments were subject to the regulations of the British Financial Services Authority, and the EU segment was in addition subject to EU regulations.^[17]

Virt-x was renamed to SWX Europe in 2008.^[18] SWX Europe came to a halt in 2009 and the trading was transferred to SIX Swiss Exchange.^[19]

International Securities Exchange

On 30 April 2007, SWX Swiss exchange acquired, jointly with [Deutsche Börse](#), the US [option](#) exchange [ISE](#). With the acquisition of [International Securities Exchange Holding](#) (ISE), one of the largest trading platforms for finance [derivatives](#) emerged. The price for ISE was \$2.8 billion and it was financed through [Eurex](#),^[20] which was then owned 85% by Deutsche Börse and 15% by SWX Swiss Exchange. The revenue of ISE was about \$178 million in 2006, and the profit around \$55 million. The ISE remains independent and keeps its structure and [branding](#).

Scoach

On 1 January 2007, SWX Swiss Exchange and Deutsche Börse jointly started and managed an exchange for structured products, a [joint venture](#) called [Scoach](#).^[21]

In February 2013, Scoach was split into Scoach Europa AG, fully owned by Deutsche Börse, and Scoach Schweiz AG, fully owned by SIX Swiss Exchange.^[22] Scoach Schweiz AG was renamed to SIX Structured Products in November 2013.^[23]

AsiaNext

In 2021, SIX Group established AsiaNext, a digital asset exchange for institutions, as a joint venture with [SBI Digital Asset Holdings](#). In 2023, AsiaNext has received a license as a Recognized Market Operator (RMO) by the [Monetary Authority of Singapore](#).^[24]

Штаб-квартира

В 2002 году штаб-квартира была перенесена на Зельнауштрассе. В 2017 году она снова переехала в парк Хард-Турм в [Цюрих-Вест](#).^[25]

Технологические достижения

For the first time in the world, in 1962, an exchange TV broadcast was introduced in Basel and Zürich. Banks started to use [computers](#), while exchanges followed more hesitantly. In 1964, [Telekurs](#) was mandated by the Zürich stock exchange to investigate how computer technologies could be used on the exchange. Only in the 1980s did computers finally find their way into exchanges. On 8 December 1995, an advanced electronic system for the processing of foreign stock in the domestic exchange market was introduced, on 2 August 1996 that of Swiss stock and options. Finally, on 16 August 1996, bonds were also electronically traded and the [trading floor](#) was discontinued.^[15]

On 3 December 2020, SIX Swiss Exchange, in collaboration with the [Bank for International Settlements](#) and [Swiss National Bank](#), completed a wholesale [central bank digital currency](#) proof-of-concept on a distributed [digital asset](#) platform.^[26]

Other services

SIX Swiss Exchange is part of the [SIX Group](#), which provides a number of other [financial market infrastructure](#) services in Switzerland. SIX Group is divided into four business units: Securities Services, Markets, Banking Services and Financial Information.^[27] These business units include services like [clearing](#), acting as [central counterparty](#), [custody services](#), [market data](#) services, [share registry](#), payment services, and running the [real-time gross settlement](#) (RTGS) system on behalf of the central bank of Switzerland, the [Swiss National Bank](#).^[28]
