ARMING YOU FOR TOMORROW'S CHALLENGES, TODAY!

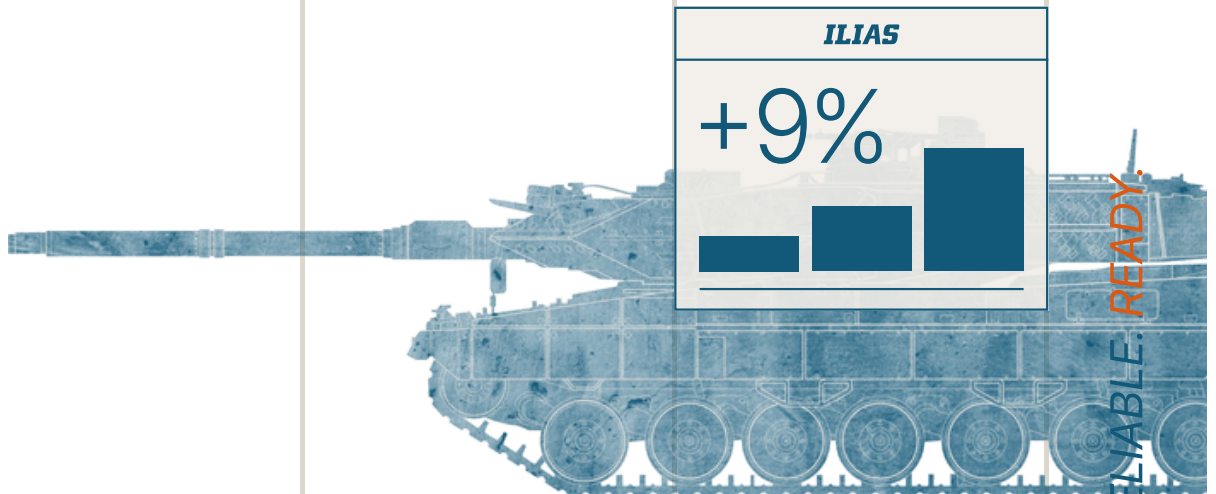

The ILIAS Defense Platform is created by military personnel with backgrounds in operations and sustainment working with innovative software developers producing state of the art code.

The ILIAS Defense Platform is a state-of-the-art 5th-generation software suite, built from the ground up to meet defense needs. It works out of the box, allowing for rapid implementation without the hassle and costs of integrating multiple solutions. Experience the power of a single source of truth that unifies four essential competencies.

SMART. RELIABLE. READY.

SUPERCHARGING MILITARY EFFECTIVENESS WITH *TRUE FORCE MULTIPLIERS*

THE
COMPREHENSIVE
ADVANTAGE
OF ILIAS
DEFENSE
PLATFORM
IN MODERN
WARFARE

A true force multiplier is an innovative approach that significantly enhances combat effectiveness. The ILIAS Defense Platform takes this concept to the next level, by seamlessly connecting sea, land, and air forces and revolutionizing your end-to-end processes.

With the ILIAS Defense Platform in play, military personnel reduce time on repetitive, time consuming manual administration tasks and focus more on making informed, critical decisions. As your single source of truth, the ILIAS Defense Platform ensures that military

INDUSTRY

SMART. RELIABLE. READY.

REPAIR, OVERHAUL, & UPGRADE (MRO&U)

Maintenance, repair, overhaul & upgrade (MRO&U) ensures minimal downtime, fully in concert with operational pace. ILIAS' MRO&U generates business processes & procedures based on the technical documentation, and consequently assures execution as designed. It deals with task redundancy, defining a battle rhythm for resource allocation – technicians, material, tooling and infrastructure.

Visibility amongst stakeholders is generated in such a way that decision making is smooth and effective, although actors are often geographically dispersed. Traditional disconnected worlds of engineering, supply chain management and depot execution are fully aligned. A performance dialogue between industry, contracting agencies and the end users is facilitated. Potential hurdles are identified and tackled before they materialize.

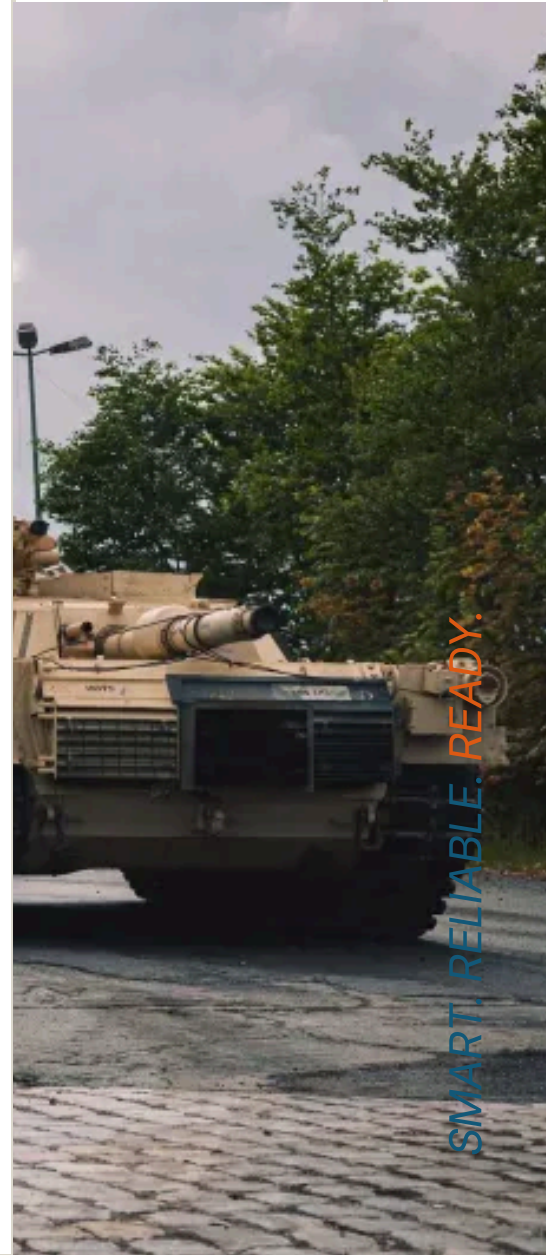

SMART. RELIABLE. READY.

ILIAS CAPABILITIES IMPLEMENTATION WHO CONTACT FLEET MANAGEMENT WE ARE

CLIENT- CENTRIC STRATEGIES FOR SUCCESS

ILIAS Fleet Management Capability provides a specific lens on the fleet, whether it is the global fleet or the fleet of a tactical unit. Insights provide for direct and effective decision making, executing actions, capturing the related data enabling the monitoring of output versus objectives. From operations to maintenance and supply, gain real-time insights into asset readiness and operational capability. Enjoy a comprehensive 360-degree view of fleet status, ensuring maximum asset readiness and traceability for audits and research.

PLANNING AND EXECUTION

WE
ARE

The ILIAS Defense Platform supports every phase of deployment with a single source of truth, ensuring data accuracy and consistency. Enhance situational awareness with real-time tools that minimize downtime and logistical bottlenecks, allowing your teams to operate at peak effectiveness — even in austere environments. Our offline capability ensures critical resource management without connectivity, synchronizing data when a connection is restored.

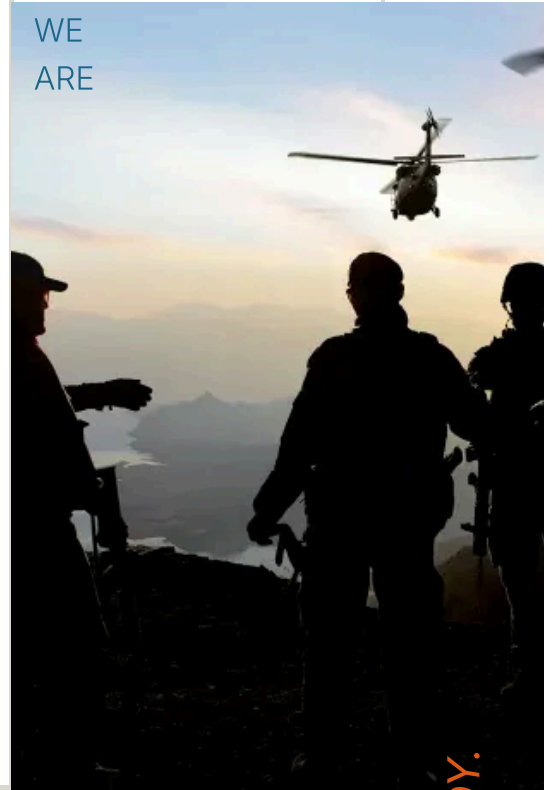

TOTAL ASSET VISIBILITY

SMART. RELIABLE. READY.

ILIAS CAPABILITIES IMPLEMENTATION WHO CONTACT

Achieve comprehensive visibility across all military assets with secure integration for third-party and client systems. The ILIAS Defense Platform offers an end-to-end overview from acquisition to disposal, enabling thorough audits and insightful analysis. Leaders receive timely information about asset mission capability, empowering them to optimize logistics and ensure the right resources are available at the right time.
