AI Is Destroying Books — And We're Letting It Happen

8 min read · 2 days ago

There is something deeply wrong with the way we are treating books in the age of AI.

For centuries, a book meant something.

It was someone's research.

Someone's imagination.

Someone's years of experience.

Sometimes, it was a piece of history that survived because somebody cared enough to preserve it.

Now, increasingly, a book can be treated as something else:

A dataset.

Buy it.

Cut it open.

Scan it.

Extract the words.

Throw away the physical copy.

Move on to the next one.

And if that sounds disturbing, it should.

Because AI isn't just changing how we read books.
