I Didn't Understand Go Channels Until I Broke Everything

Deadlocks, goroutines, WaitGroups, and buffered vs unbuffered channels — explained by someone who just figured it out

So to put it simply before this blog, I didn't know what channels were and how they work. And after learning about them I'm writing this blog from a learner's perspective and this is the type of blog my past self would genuinely appreciate reading.

So let's get right into it:

What are Channels?

Before we actually start writing some code we need to understand what channels actually are.

Channels are basically a way to communicate between different go routines without causing race conditions
