Попробуйте Nano Banana 2 Lite 🍌

Создано для авторов, бизнеса и разработчиков. Создано для быстрого визуального исследования.

Молниеносная задержка

Исследуйте, дорабатывайте и продолжайте рабочий процесс с существенно сниженной задержкой.

Экономичность в масштабе

Создавайте тысячи изображений за малую часть стоимости более тяжелых производственных моделей.

Качество выше всего

Контроль и точность, которых вы ожидаете от Nano Banana, в ускоренном режиме. Сохраняйте единообразие персонажей, точно редактируйте визуальные эффекты и опирайтесь на реальные знания.

От идеи до изображения за секунды

Nano Banana 2 Lite позволяет воплощать ваши идеи в жизнь — от быстрого прототипирования до наполнения приложений в режиме реального времени.

SPACE LIFT

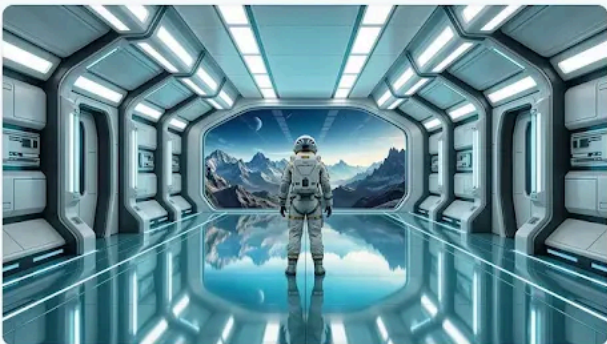

Space Lift

Space Lift is an interior design app that lets you instantly reimagine any room. Upload an image of your space, and watch the app generate a variety of fully realized concepts, from Mid-Century Modern to Bohemian Chic. Swipe through each custom card to find the perfect design scheme for your home.

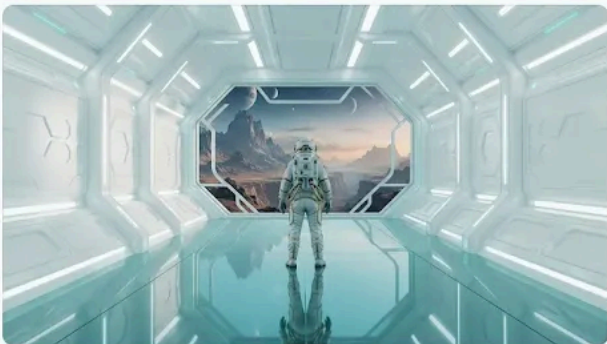

Comparisons

Our most efficient model to date, Nano Banana 2 Lite offers the best balance of quality and speed. From prompt adherence to details and control, see how it performs alongside our premier Nano Banana 2 model.

Creating your prompts

Use detailed prompts to take more control over the images you generate. Think about what you want to see – the characters, the setting, and the overall feel. The more detail you add, the closer the image will be to what you’ve imagined.

[Learn how to prompt](#)

Limitations

While Gemini can now create a wide range of images, we're still working on improving key capabilities. You should always carefully check images you create – including text in images – for accuracy.

Visual and text fidelity

Not every image Gemini generates will be perfect – it can still struggle with small faces, accurate spelling, and fine details in images.

Data and factual accuracy

The model's real-world knowledge is extensive but not infallible. When generating infographics, annotating diagrams, or representing complex data, it may misinterpret information or produce factually incorrect results. Always verify data-driven outputs.

Translation and localization

Google DeepMind

Complex edits and image blending

Advanced features like masked editing, major lighting changes (like day to night), or blending multiple images may sometimes produce unnatural results, visual artifacts, or disjointed scenes.

Character features

The model excels at character consistency, but it may not always get it right. We're working to make this consistency even more reliable.

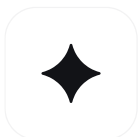

Safety

We use extensive filtering and data labeling to minimize harmful content in datasets and reduce the likelihood of harmful outputs. We also conduct red teaming and evaluations on content safety, including child safety, and representation.

Images created with Nano Banana 2 have all our latest privacy and safety features. This includes SynthID, our tool that embeds an invisible digital watermark directly into an image, allowing it to be identified as AI generated.
