Редактирование с помощью естественного языка

Представьте, что Gemini Omni — это Nano Banana, только для видео.

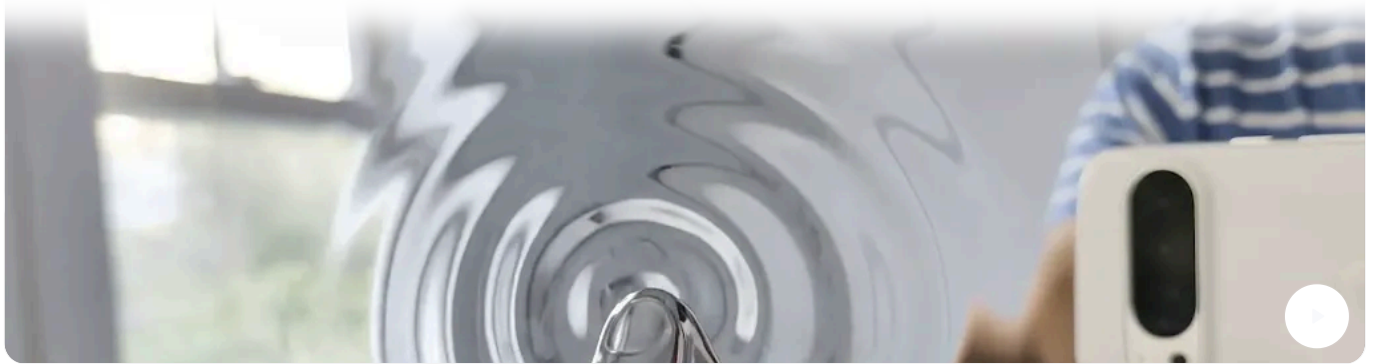

Создавайте и дорабатывайте свое творение на любом этапе с помощью естественного языка.

Преобразите свой мир

Меняйте эстетику, действие или эффект в зависимости от исходного видео.

Google DeepMind

Подсказка: когда человек касается зеркала, оно красиво переливается, как жидкость, а рука человека превращается в зеркальный матер... + П

< >

Переосмыслите происходящее

Измените то, что происходит в ваших видео, превратив обыденное в нечто захватывающее.

Google DeepMind

Подсказка: сделайте так, чтобы странная форма моего отверстия для руки увеличивала масштаб и делала изображение более четким.

+

Подсказка: когда палец в <видео> касается игрушки-животного, воспроизведите звук, который издает животное.

+

Google DeepMind

Prompt: The lights of the apartments start turning on in sync with the music.

+

Edit real videos based on images

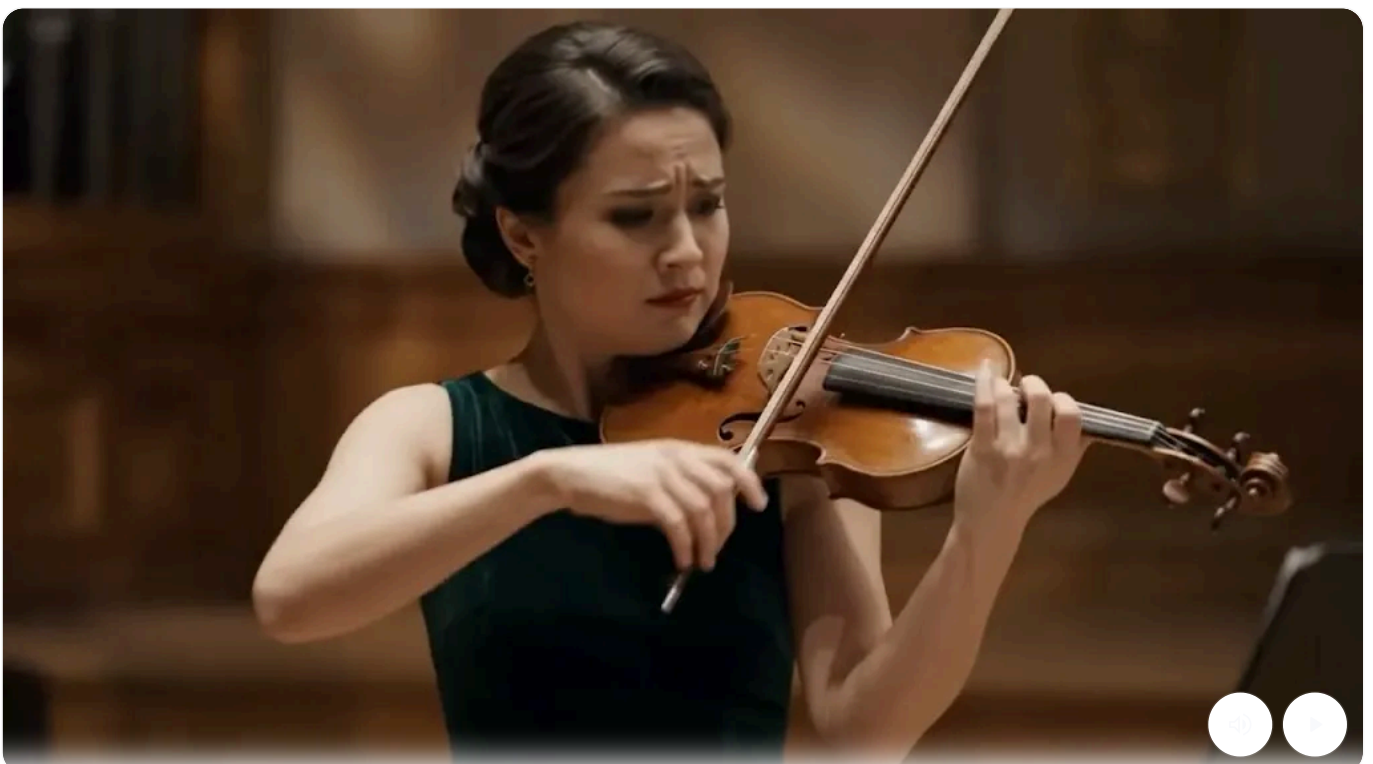

Use reference images to edit your creations, giving you even more creative control.

Prompt: When the hand opens, make a vast 3d architectural structure based on this image start building upward, sitting in the palm of the ha... + Pr

< >

Edit over multiple turns, with consistency

Craft your scene step-by-step, changing specific details, environments, camera angles, and more.

Prompt: Transport the violinist to the image environment

+

Prompt: Make the violin invisible

Prompt: Change the camera angle to be over the violinist's shoulder.

+

Swap in different objects or characters with natural language

Replace characters and objects in your video just by asking, all while maintaining a coherent, cohesive scene.

Prompt: Change spaceship to <object>

Bring ideas to life, grounded in Gemini's world knowledge

Create scenes that follow real-world logic. Gemini Omni pulls from its deep knowledge of history, biology, and narrative logic to construct compelling stories.

Create output that follows real-world physics

Omni has an intuitive understanding of forces like gravity, kinetic energy, and fluid dynamics for more realistic movement.

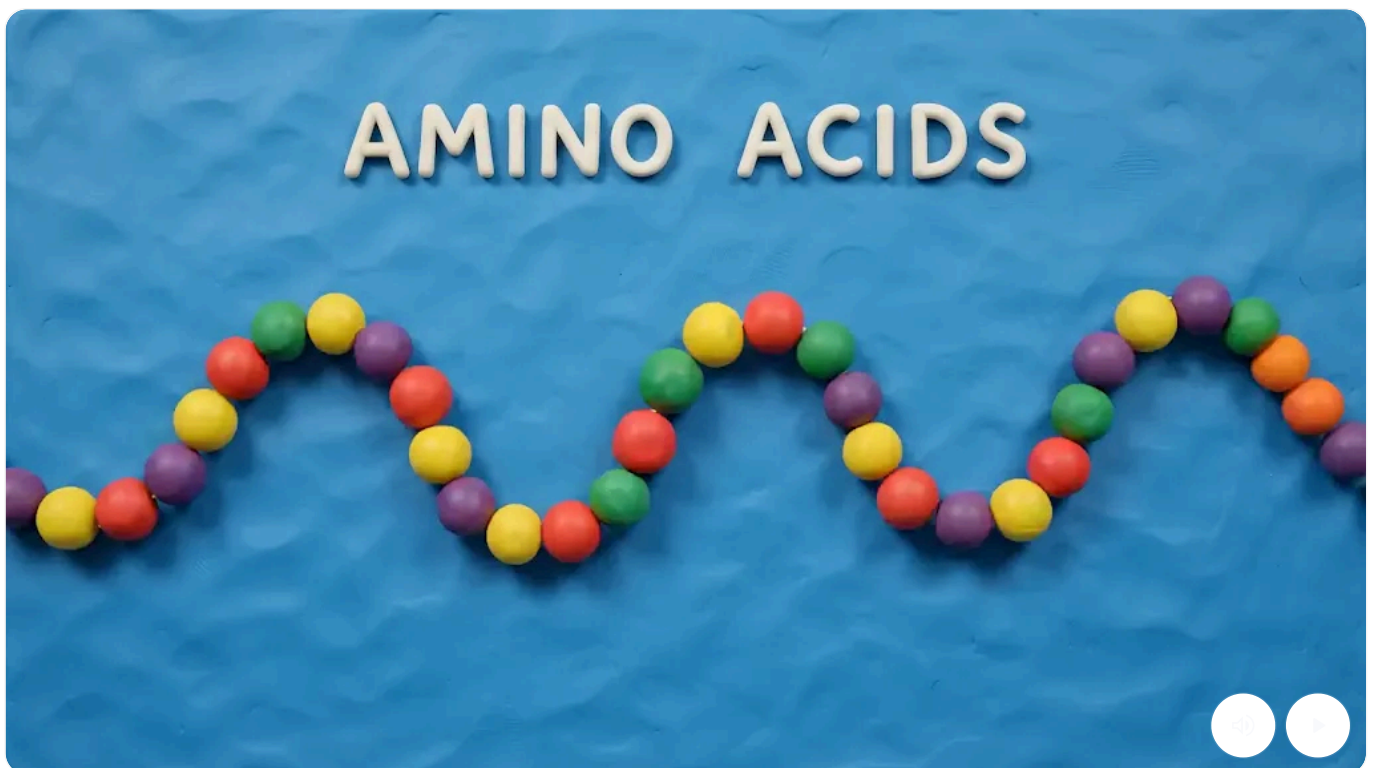

Prompt: A marble rolling fast on a chain reaction style track, continuous smooth shot

+

Draw on real-world history, science, and math

Omni understands world history, science, and math – and knows how to craft stories around it.

Prompt: claymation explainer of protein folding, everything is made out of clay, no hands, stop motion, accurate

+

Prompt: A skeuomorphism stop motion explainer about how the brain hippocampus works with a compelling voiceover. Don't add seahorses... +

Sync text with onscreen action

Go beyond just rendering realistic text. Create videos that coherently connect text to what's happening in the video.

Prompt: The video shows items of the alphabet. An unusual item starting with each letter is shown sitting on a table (like a Capybara for C, di... +

Prompt: word by word, one word on a the screen at a time: did, you, know, that, this, model, can, do, pretty, good, text!? each word appears ... +

Reference anything

Reference and combine ingredients to maintain control and consistency over your scene.

Combine multiple inputs

Prompt with different inputs, and leave Gemini Omni to craft them into a single compelling narrative.

Prompt: Referring to the extreme camera movement, perspective, and distortion in <video>, create a front-facing full-body walk cycle of the ... + Pr

< >

Transfer motion and styles

Apply motion and style references from an image or video across to your output.

Prompt: Apply the pose and motion from input video to provided character from this image. Apply style from image reference to the new vid... + Pr

< >

Swap characters or objects with a reference image
Provide an image of a character with your video, and the new character will match your motion and dialogue seamlessly.

Prompt: turn me into this character Pr

< >

Translate drawings into video
Turn sketches into realistic video – and use your doodles to guide how individual elements should move.

Prompt: turn this into realistic footage, using the drawing only as a guide for movement, do not show the drawing in the final video

+ Pr

< >

Creating your prompts

Use our prompt guide to create realistic, coherent, and creative output.

Safety

From development to deployment

Gemini Omni Flash was developed in partnership with internal safety, security, and responsibility teams. A range of evaluations and red teaming activities were conducted to help improve the model and inform decision-making. These evaluations and activities align with [Google's AI Principles](#) and [responsible AI approach](#), as well as Google's Generative AI policies (e.g. [Gen AI Prohibited Use Policy](#) and the [Gemini API Additional Terms of Service](#)). Evaluation types included but were not limited to:

Training/development evaluations including automated and human evaluations carried out continuously throughout and after the model's training, to monitor its progress and performance

Human red teaming conducted by specialist teams who sit outside of the model development team, across the policies and desiderata, deliberately trying to spot weaknesses and ensure the model adheres to safety policies and desired outcomes

Automated red teaming to dynamically evaluate Gemini Omni Flash for safety and security considerations at scale, complementing human red teaming and static evaluations

Ethics and safety reviews conducted ahead of the model's release

Content created or edited with Omni in the Gemini app, Google Flow or YouTube includes our imperceptible [SynthID](#) digital watermark and [C2PA Content Credentials](#). You can easily verify content through the Gemini app and coming soon to Chrome and Search. You can find out more about how we're expanding our content transparency and verification tools to help you understand how content was created and edited across the web [in our blog post](#).

Showcase

The logo for Cartwheel, featuring the word "cartwheel" in a bold, lowercase, sans-serif font. The letter "a" is stylized with a curved line above it, resembling a wheel or a smile.

"Gemini Omni Flash is one of the first models that artists can truly rely on. It has an excellent ability to generate and edit shots that have dynamic camera motion. It also is quite good at understanding style and motion in ways that competitive video models just don't get right."

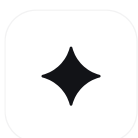

Andrew Carr, Co-Founder & Chief Scientist, Cartwheel

"Gemini Omni Flash is so good. Generative AI can now build and revise full videos in minutes."

Ali Sadeghian, Co-Founder & CTO, Aardvark
