

Инициализация

```
model = NSAMPFeedbackLoops(N=128)
```

```
patterns = torch.randn(1000, 128) * 0.5
```

```
model.x0.data = patterns[0] # Эталон x0
```

Тест 1: Полное воспоминание (xin
близко к x0)

```
xin_full = model.x0 + 0.1 * torch.randn(128)
```

```
result_full =
```

```
model.internal_feedback_loop(xin_full)
```

```
print("Полное: успех =", result_full['success'],  
      "итераций =", result_full['iterations'])
```

Тест 2: Частичное воспоминание (xin
далеко от x0)

```
xin_partial = patterns[1] # Другой паттерн
```

```
result_partial =
```

```
model.internal_feedback_loop(xin_partial)
```

```
print("Частичное: успех =",
```

```
result_partial['success'],
```

```
"НКЯ =", result_partial['tip_of_tongue'])
```
