в сравнении с базовыми показателями MDR.

92%

Human-AI Alignment

AI and analyst agree 9 in 10.

7 Days

Fully-Operational

From signature to production.

AGENTIC SWARMS. ONE LOOP. ZERO GAPS.

A swarm of specialized agents handles the complete alert-to-case lifecycle without a single manual handoff. Your stack on the left, your team on the right | nothing lost in between.

BUILT FOR SECURITY TEAMS RUNNING OUT OF TIME.

01 // CISO

The CISO

Your SOC sees 3,832 alerts a day on average and 62% are never investigated. You need a defensible answer for the board on coverage, dwell time, and audit chain. TENEX gives you 100% coverage, under-1-minute triage, and a compliance-ready audit trail from day one.

02 // SOC_LEAD

The SOC Lead

Your team is drowning and burning out on triage that machines should handle. TENEX handles 95% of T1/T2 volume autonomously. Your analysts focus on the 5% that actually requires human judgment, escalation, and accountability.

03 // DET_ENG

The Detection Engineer

Your rules are stale and your SIEM is a noisy black hole. TENEX brings 4,000+ detection rules, Tier 0 noise suppression from day one, and continuous autonomous tuning. Your existing rules and log sources stay intact | no migration.

EVERY ALERT.
EVERY THREAT.
FULLY-AGENTIC.

TENEX goes live inside the environment you already own, with a Forward Deployed Engineer embedded on your team.

ACCEPT THE CHALLENGE.

Tell us about your environment and we'll show you exactly what 7-day go-live looks like.

*** GO-LIVE TIMELINE DISCLOSURE**

The referenced go-live timeline is an estimate for prospective customers with an existing, active deployment of Google Security Operations or Microsoft Sentinel and assumes timely completion of all required Onboarding Requirements, as further described in the applicable Statement of Work. Customers using other SIEM platforms, or without an existing deployment of Google Security Operations or Microsoft Sentinel, should expect a longer onboarding and go-live timeline. This timeline is provided for illustrative purposes only and does not constitute a commitment, service level, or warranty of any specific go-live date.
