

Нативный способ работы с искусственным интеллектом

Adapt — это корпоративный мозг: единый уровень контекста для каждого сотрудника и каждого агента, который отвечает на вопросы и выполняет работу в Slack и в интернете.

Начните с бесплатных кредитов на сумму 100 долларов

● Кредитная карта не требуется ● SOC 2 Type II

«МОЗГ» КОМПАНИИ

Ваш «мозг» компании Отвечает. Понимает. Действует.

Adapt превращает знания компании в динамичный «мозг», который самостоятельно анализирует и обновляет информацию. Его можно представить как единый общий источник достоверных данных, повышающий эффективность работы каждого.

Как работает Адаптирующийся мозг

01 Знание

Факты, политика и решения организации, изученные и актуальные на сегодняшний день

02 Skills

Reusable procedures and workflows the agent utilizes for consistent outcomes

03 Memory

A shared system every task reads from and writes back to

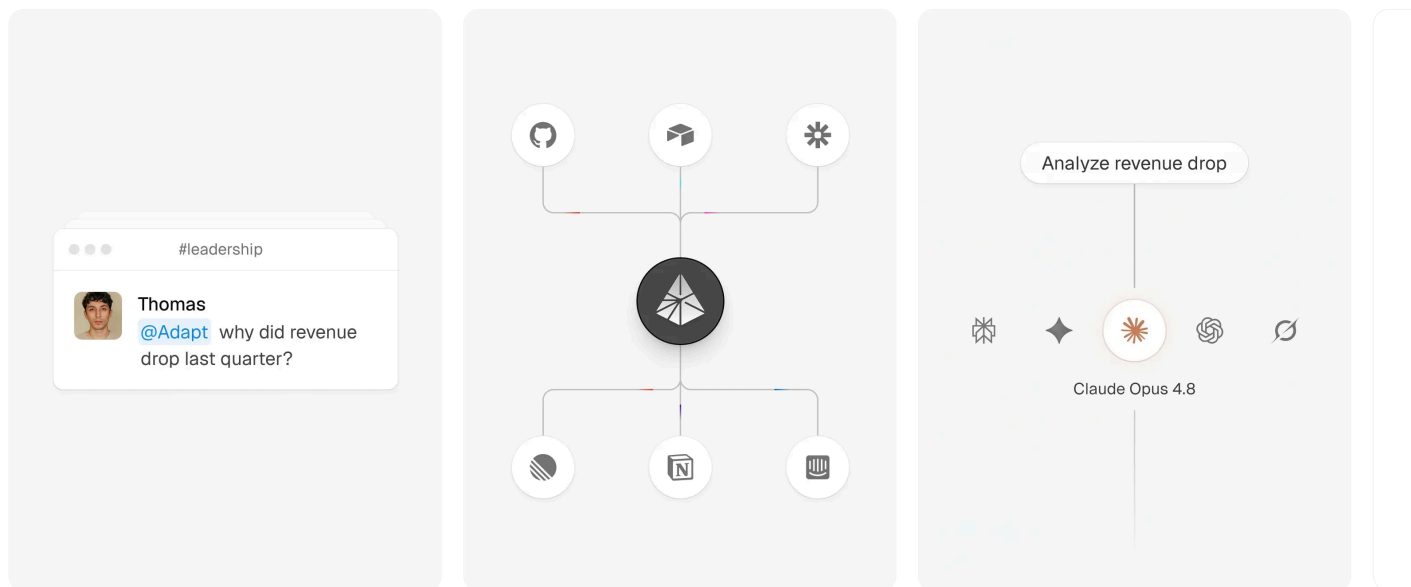

04

Just docs

КАК ЭТО РАБОТАЕТ

Превратите Slack в рабочее пространство с искусственным интеллектом Предоставьте всем доступ к Frontier AI

01 Ask

Tag @Adapt in Slack or our web app for help with any question or task

02 Connect

Dynamically pulls context from the company brain and connected tools

03 Reason

Routes queries to the best models for every task automatically

04

FEATURES

Ask. Automate. Build. Build loops for work.

ASK YOUR DATA

Ask questions across the stack

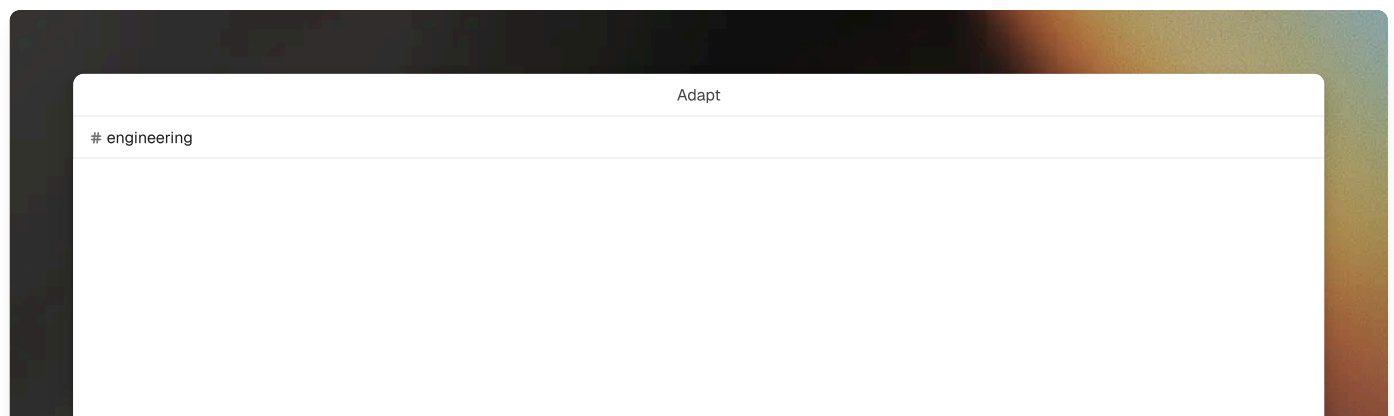

Adapt pulls live data, runs analysis, and delivers evidence-backed answers across every connected system. No dashboards to build. No SQL to write. Just ask.

AUTOMATE WORKFLOWS AND TASKS

Automate work on your schedule

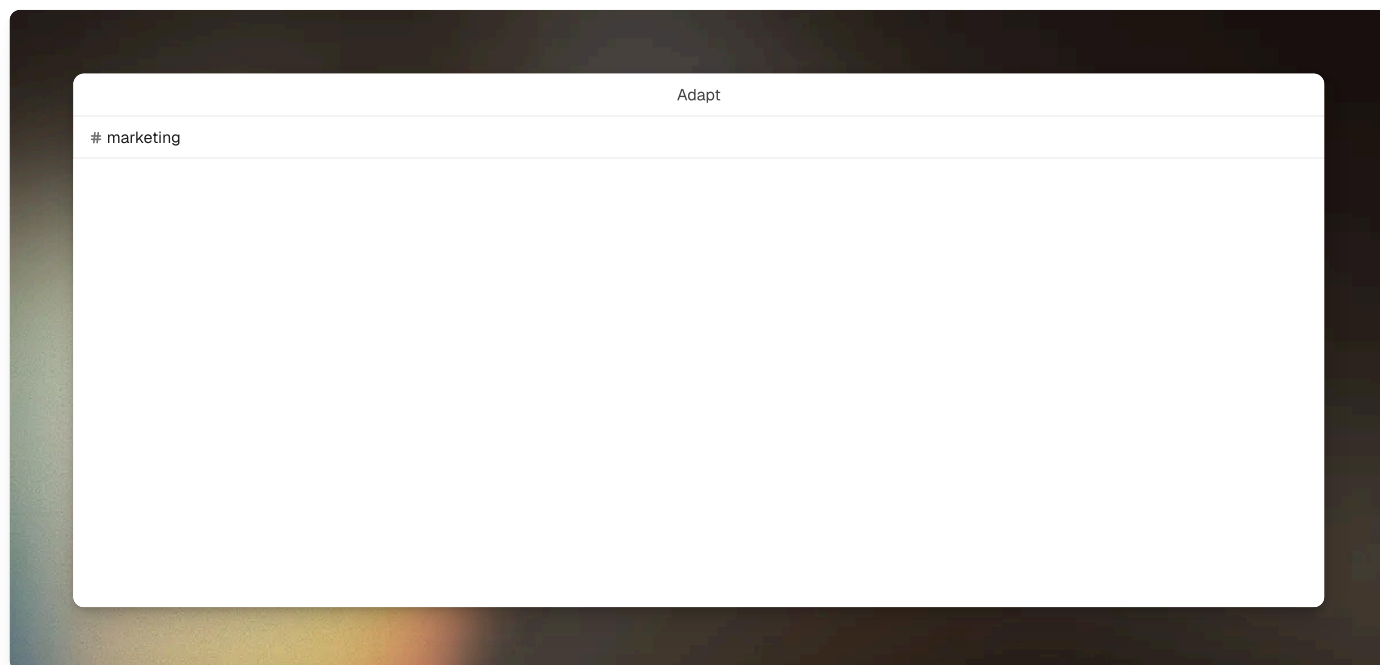

Set up recurring workflows and scheduled tasks like daily briefings, pipeline reports, and systems monitoring. Automate multi-step workflows across systems to free up your team.

BUILD INTERNAL APPS AND DASHBOARDS

Build apps and dashboards without a developer

Describe what you need and Adapt builds it. Internal tools, calculators, dashboards, and utilities - deployed instantly with no technical knowledge required and easily shareable with your team in a secure environment.

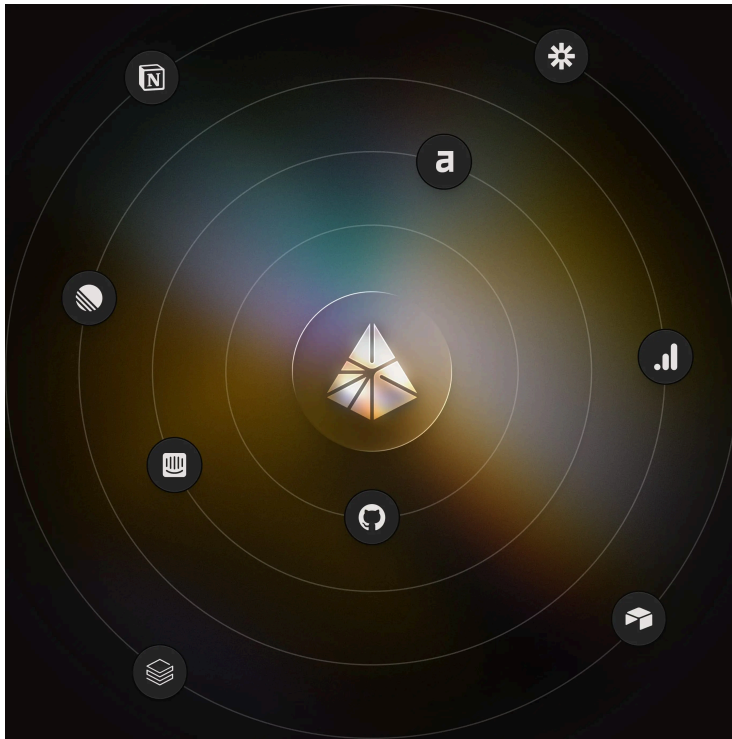

INTEGRATIONS

Context from everywhere. Connected in one place.

Adapt connects to everything your company runs on and turns it into one shared brain. Your data stays private - never used to train models, and never shared.

-  Data warehouse
-  Business Intelligence tools
-  Marketing automation
-  Help desk
-  Payment providers

and more...

TESTIMONIALS

Users love us.
But don't take it from us.

Nathan Potter
CTO at Wander

Our data engineers field data requests from across the business in Slack. Now we use Adapt to deflect those questions from the data team, so they can focus on more strategic work.

USE CASES

Make your company 10x faster.
Across every team.

 Leadership

 Marketing

 Product

 Sales

Command every system in one place

✓ **Daily briefing**

Always know the highest leverage things you should be focused on, delivered to you daily

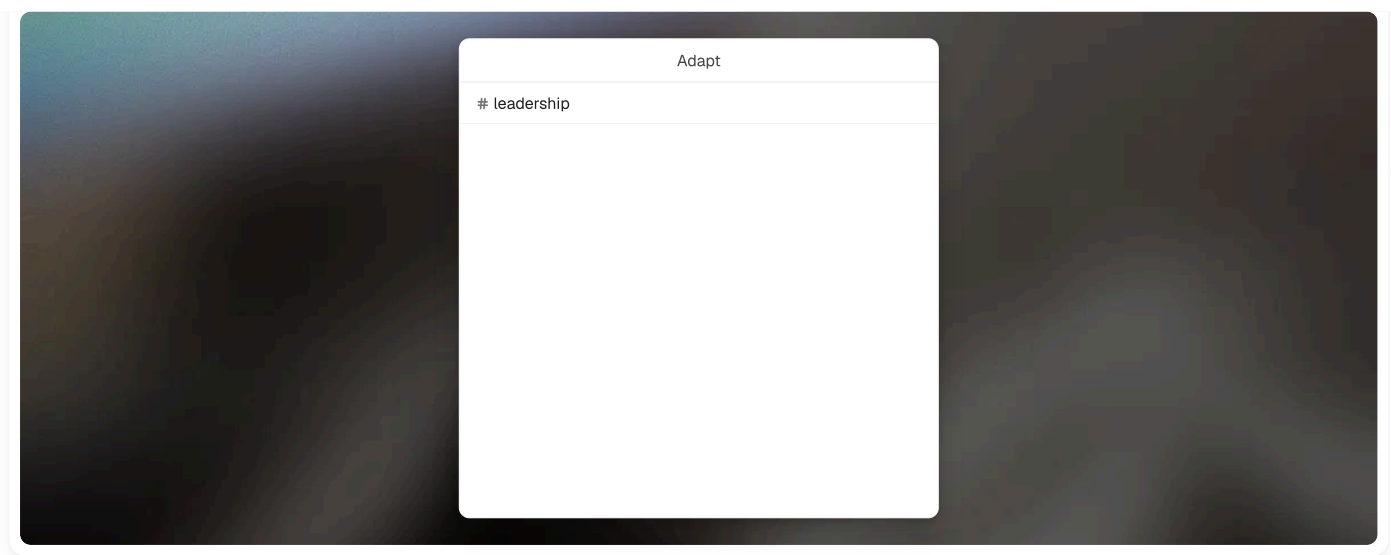

✓ **Risk detection**

Detect churn risk and changes to ARR before they happen.

✓ **Board prep**

Run cross-system analysis for board-ready metrics and data.

SECURITY

A brain you can trust. Architected for security.

Adapt is a U.S.-based company that adheres to industry best practices, appropriate protections, and smart guardrails to keep your data secure.

Data Protection

Every task runs in an isolated, secure sandbox. Data is encrypted in transit and at rest, and stays private to your company.

Trust and compliance

We maintain high standards for trust & compliance, including SOC 2 Type II.

Access and controls

Granular access controls and audit logging provide visibility in how information is used inside your organization.

SOC 2 Type II

Independently audited and certified.

FAQ

Frequently asked questions

How is Adapt different from enterprise search like Glean?	—
Search tools index your company and wait for someone to ask. Adapt is a company brain: it holds live context from every connected tool, reasons over it, and takes action. It does not just surface documents, it does the work and cites its sources.	
We want to build and own our company brain in-house. Why use Adapt?	+
Half of our team already uses Claude Code. How does Adapt fit?	+
Will Adapt work for people who are not AI power users?	+
Does Adapt work in Slack, or do I need to use a separate app?	+
Can Adapt actually take action, or does it just answer questions?	+
How does Adapt access our data securely?	+
Where does our data get stored?	+
How long does it take to get Adapt running?	+
Do we need engineering resources to set up Adapt?	+
Can we start with just one team or department?	+
How does pricing work?	+

Every company will have a brain.
It's inevitable.

Get started in minutes, not months.
