Vibe-coding website company Lovable has raised \$400 million in Series C funding at a \$13.3 billion valuation. The company also recently announced a **partnership with AI infrastructure provider Cerebras** [<https://lovable.dev/blog/cerebras-partnership>] to accelerate AI inference on its platform.

Lovable [<https://lovable.dev/>] is a vibe-coding website where users can create full-stack web applications without coding expertise by describing what they want in plain English. The platform combines AI coding tools, real-time collaboration, and project sharing. Customers include the likes of Adidas, Deutsche Telekom, NVIDIA, Udacity, and Workday.

In the **August 12 funding announcement** [<https://lovable.dev/blog/series-c>], the company also unveiled several new Lovable platform capabilities:

- Built-in payment functionality powered by Paddle and Stripe
- SEO and AI-search tools to improve discoverability, including integration with Semrush
- Deeper integrations with Google Workspace, Microsoft 365, Salesforce, Stripe, and ElevenLabs
- Automatic and scheduled security scanning
- Additional governance and visibility features including publishing controls, abandoned app clean-up, and workspace insights
- A dedicated security page, showing which security controls are live for each app

In addition, Lovable recently became the first AI coding platform to receive **AIUC-1 certification** [<https://assets.lovable.dev/content/news/setting-the-standard-for-agentic-development/setting-the-standard-for-agentic-development-aiuc-1.pdf>]. AIUC-1 is a security, safety, and reliability standard built specifically for AI agents, based on input from Stanford, MIT, MITRE, and the Cloud Security Alliance.

Lovable's \$400 million in Series C funding was led by Menlo Ventures and co-led by the Scaleup Europe Fund, managed by EQT. The round also includes Balderton Capital and Carmignac from Europe, Kaszek Ventures and LTS Growth from Latin America, Tencent and World Innovation Lab from Asia, and Regent from the United States.

Note: One of Lovable's new Series C investors is Regent, the investment firm that also owns Foundry, publisher of InfoWorld.
