

Sparkpost <> EasySender Integration Setup Guide

1. Log in to SparkPost:

Sign in to your SparkPost account (US or EU region).

2. Create API Key:

Navigate to Configuration > API Keys and click "Create API Key."

3. Set Permissions:

Give the key a name (e.g., "Marketing Dashboard"). Under API Permissions, select "Metrics: Read-only" and "Transmissions: Read-only."

4. Copy the Key:

Important: Copy the API key immediately. It will not be shown again.

5. Connect:

Paste the API Key into our integration settings panel.

6. Verify Domain:

Ensure your "Sending Domain" is verified in SparkPost to allow us to retrieve campaign data correctly.
